## Generations and Gender Survey Wave 1 - Consolidated (GGS Wave 1 - Cons.)

### Overview

<b>Identification</b>	GGSW1.W2.Cons.
-----------------------	----------------

#### Abstract

The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.

In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion".

The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:

- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.
- A broad age range. It includes respondents between the ages of 18 and 80.
- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.
- A large sample size. It has an average of 9,000 respondents per country at Wave 1.
- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.
- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.

### Scope & Coverage

<b>Keywords</b>	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender Relations, Intergenerational exchange, Informal and formal care, Well being and health, Grandparenthood, Economic activity, Retirement
-----------------	---

<b>Countries</b>	
------------------	--

### Accessibility

<b>Access Authority</b>	UNECE Population Unit - Palais des Nations - CH-1211 Geneva 10 - Switzerland. Tel: +41 22 917 24 77 - fax: +41 22 917 01 07 , <a href="http://www.unece.org/pau/">http://www.unece.org/pau/</a> , <a href="mailto:ggp@unece.org">ggp@unece.org</a>

#### Access Conditions

In order to access, it is necessary to subscribe to the GGP Data User Space, and to follow the instructions available on the GGP data access webpage.

#### Citation Requirements

In any work emanating from research based on the Generations and Gender Survey micro-data, I will acknowledge that these data were obtained from the GGP Data Archive and refer to the publication that describes the model survey instruments: United Nations 2005. Generations & Gender Programme: Survey Instruments. New York and Geneva: UN, 2005

## **Rights & Disclaimer**

### **Disclaimer**

The authors and producers bear no responsibility for the uses of the GGS data, or for interpretations or inferences based on these uses. The producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

# Files Description

Dataset contains 1 file(s)

<b>GGG_Wave1_V.4.2.</b>	
<b># Cases</b>	179524
<b># Variable(s)</b>	2351
<b>File Structure</b>	Type: relational Key(s): acountry (Country) , arid (R identification number)
<p><b><u>File Content</u></b></p> <p>This study includes the consolidated GGS Wave 1 datasets. It contains all the GGS Wave 1 released datasets, except for Germany Turkish-subsample. All the available variables are included (also the country specific variables). Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><b><u>Producer</u></b></p> <p>The file is produced centrally by the Netherlands Interdisciplinary Demographic Institute (NIDI, The Netherlands), in collaboration with the Survey Department of the "Institut national d'études démographiques" (INED, France).</p>	
<p><b><u>Version</u></b></p> <p>Harmonized dataset, GGS Wave1, version 4.2.</p> <p>Version 4.2 provides the additional variables which are derived from the pre-existing datasets.</p> <ul style="list-style-type: none"> <li>- Variables derived from grid variables and variables which concern the respondents and his/her partner: numdissol numdivorce nummarriage numpartners livingwithpartner childprevp femage maleage femeduc maleeduc fertintent numbiol numres numnonres numstep numallchild ageyoungest ageoldest numrespleave numotherparentleave coreschild coresparen coresgrandp coressibl.</li> <li>- Variables derived from month and year variable: a107AgeR,a121AgeR,a150AgeR,a239aAgeR,a239bAgeR,a240AgeR,a301AgeR,a302bAgeR,a311AgeR,a314bAgeR, a314dAgeR,a371AgeR, a372bAgeR, a603AgeR, a608AgeR , a610AgeR, a613AgeR, a614AgeR, a619AgeR, a621AgeR, a816AgeR, a822AgeR, a871AgeR, a5116AgeR, a5117bAgeR, a808Dur a822Dur a907Dur a911Dur a914Dur, a303cAgeP a315AgeP a316cAgeP a374cAgeP a608AgeP a610AgeP a617bAgeP a621AgeP a914AgeP a941AgeP, a302bTdiff a314bTdiff a314dTdiff a372bTdiff.</li> <li>- Variables derived from hours and minutes variables: a324_hour a520_hour a540_hour.</li> <li>- Variables derived from frequency and unit variables: a205mnth a241mnth a325mnth a355mnth a359mnth a363mnth a367mnth a521mnth a541mnth a1008mnth a1102mnth, a203c_?w a204c_?w.</li> <li>- Occupation variables recoded into ISCO-88 1 digit: a828_1dig a832_1dig a861_1dig a917_1dig a921_1dig a933_1dig a5112_1dig a5114_1dig.</li> </ul>	

Information concerning changes across different versions of GGS datasets are available in the field "Data Files Description" of each country data file available in the GGS Online Data Analysis web platform.

### **Processing Checks**

#### **DATA HARMONISATION**

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

##### 1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

##### 2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("\_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3\_# or bhg3\_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

##### 3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

##### 4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

##### 5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

##### 6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

### # femage: If partnered: age of female

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 14-85] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=65635 /-] [Invalid=113889 /-]
<b>Definition</b>	Derived variable
<b>Universe</b>	If R has a partner
<b>Notes</b>	This variable indicates the age of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents age is used (aage.)  If the respondent is male and in a relationship with a female then their age is derived depending on the nature of the relationship. For a resident partner the age was copied from the Household grid (ahg5_); for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y). Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset. Note that this variable does not have a value for same-sex partnerships.

### # coreschild: Respondent has coresident child

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
--------------------	--

## File : GGS\_Wave1\_V.4.2.

### # coreschild: Respondent has coresident child

Statistics [NW/ W] [Valid=179524 /-] [Invalid=0 /-]

Definition Derived variable

Notes "Yes" if Respondent's or Respondent's partner's child is present in the Household grid (codes 2 through 6, and country specific values 2402 and 1702); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	82605	46.0%
2	No	96919	54.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # coresparen: Respondent has coresident parent

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=\*]

Statistics [NW/ W] [Valid=179524 /-] [Invalid=0 /-]

Definition Derived variable

Notes "Yes" if Respondent's or Respondent's partner's parent is present in the Household grid (codes 7 through 10); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	29774	16.6%
2	No	149750	83.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # coresgrandp: Respondent has coresident grandparent or great-grandparent

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=\*]

Statistics [NW/ W] [Valid=179524 /-] [Invalid=0 /-]

Definition Derived variable

Notes "Yes" if Respondent's or Respondent's partner's grandparent or great-grandparent is present in the Household grid (code 12); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	2167	1.2%
2	No	177357	98.8%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # coressibl: Respondent has coresident sibling

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=\*]

Statistics [NW/ W] [Valid=179524 /-] [Invalid=0 /-]

Definition Derived variable

Notes "Yes" if Respondent's or Respondent's partner's sibling is present in the Household (codes 13, 14); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	12897	7.2%
2	No	166627	92.8%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # livingwithpartner: Partner living in household of respondent

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=\*]

Statistics [NW/ W] [Valid=179524 /-] [Invalid=0 /-]

Definition Derived variable

Notes "Yes" if Respondent's partner is present in the Household grid; "No" otherwise.

## File : GGS\_Wave1\_V.4.2.

### # livingwithpartner: Partner living in household of respondent

### # a121AgeR: R's age of starting to live in current dwelling

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-78] [Missing=*997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=127686 /-] [Invalid=51838 /-] [Mean=28.192 /-] [StdDev=15.509 /-]
<b>Definition</b>	Derived variable from Q 115 core questionnaire
<b>Literal question</b>	In what month and year did you start living in this [type of accommodation]?
<b>Notes</b>	<p>R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the current dwelling was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"</p> <p>Data is not available for Estonia.</p>

# a150AgeR: R's age of achieving the current education level	
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-69] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=117392 /-] [Invalid=62132 /-] [Mean=19.803 /-] [StdDev=5.501 /-]
<b>Definition</b>	Derived variable from Q 122 core questionnaire
<b>Literal question</b>	In what month and year did you reach that level?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".  Data is not available for Norway.

**# a205mnth: Personal costs for child care per month**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-1317] [Missing=*/9999997/9999998/9999999]
<b>Statistics [NW/ W]</b>	[Valid=12718 /-] [Invalid=166806 /-] [Mean=206.436 /-] [StdDev=444.957 /-]
<b>Definition</b>	Q 205 core questionnaire
<b>Universe</b>	If children younger than 14 are present in the household
<b>Literal question</b>	How much does your household usually pay per month for childcare, if anything?
<b>Notes</b>	Frequencies per week and year were converted into frequency per month. Values have been rounded to 1/10; values exceeding 1 have been rounded to the nearest integer.

# a239aAgeR: R's age at birth of oldest grandchild

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 19-72] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=29876 /-] [Invalid=149648 /-] [Mean=48.135 /-] [StdDev=6.496 /-]
<b>Definition</b>	Derived variable from Q 239.a core questionnaire
<b>Universe</b>	If R has 2 or more grandchildren
<b>Literal question</b>	In what month and year was the oldest of your grandchildren born?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month at birth of oldest grandchild was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

### # a303cAgeP: Partner's age of obtaining permanent residence

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=5395 /-] [Invalid=174129 /-] [Mean=21.27 /-] [StdDev=12.089 /-]
<b>Definition</b>	Derived variable from Q 303.c core questionnaire
<b>Universe</b>	If code 2 on Q 303.a
<b>Literal question</b>	In what month and year did he/she first start living permanently in [country]?
<b>Notes</b>	Partner's time of birth was either deduced from HH grid. If information on partner's month of birth / month when partner started living permanently in country was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

<b># a311AgeR: R's age at start of current relationship</b>			
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 10-72] [Missing=*/997/998/999]		
<b>Statistics [NW/ W]</b>	[Valid=9479 /-] [Invalid=170045 /-] [Mean=29.88 /-] [StdDev=12.363 /-]		
<b>Definition</b>	Derived variable from Q 307 core questionnaire		
<b>Universe</b>	If R has a non-resident partner (code 1 on Q 306)		
<b>Literal question</b>	In what month and year did this relationship start?		
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month when started current relationship was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

# a316cAgeP: Partner's age at start of permanent residence

Notes

Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"
