## Generations and Gender Survey Wave 1 - Consolidated (GGS Wave 1 - Cons.)

### Overview

<b>Identification</b>	GGSW1.Cons.
<p><b>Abstract</b></p> <p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> <li>- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.</li> <li>- A broad age range. It includes respondents between the ages of 18 and 80.</li> <li>- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.</li> <li>- A large sample size. It has an average of 9,000 respondents per country at Wave 1.</li> <li>- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.</li> <li>- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.</li> </ul>	

### Scope & Coverage

<b>Keywords</b>	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender Relations, Intergenerational exchange, Informal and formal care, Well being and health, Grandparenthood, Economic activity, Retirement
<b>Countries</b>

## **Rights & Disclaimer**

### **Disclaimer**

The authors and producers bear no responsibility for the uses of the GGS data, or for interpretations or inferences based on these uses. The producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

# Files Description

Dataset contains 1 file(s)

<b>GGG_Wave1_V.4.3.</b>	
<b># Cases</b>	189212
<b># Variable(s)</b>	2372
<p><b><u>File Content</u></b></p> <p>This study includes the consolidated GGS Wave 1 datasets. It contains all the GGS Wave 1 released datasets, except for Germany Turkish-subsample. All the available variables are included (also the country specific variables).</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><b><u>Producer</u></b></p> <p>The file is produced centrally by the Netherlands Interdisciplinary Demographic Institute (NIDI, The Netherlands), in collaboration with the Survey Department of the "Institut national d'études démographiques" (INED, France).</p>	
<p><b><u>Version</u></b></p> <p>Harmonized dataset, GGS Wave1, version 4.3.</p> <p>Variables corrected with Version 4.3.</p> <ul style="list-style-type: none"> <li>- fertintent (no more ambiguous labelling)</li> <li>- a1101 (corrected error in coding)</li> <li>- aweight (now available also for NLD CZE SWE POL)</li> <li>- aregion (now available also for HUN)</li> <li>- aplace (now available also for HUN)</li> <li>- a5112 (corrected routing error for ROU)</li> <li>- a5113 (corrected routing error for ROU)</li> <li>- a5114 (corrected routing error for ROU)</li> <li>- a5115 (corrected routing error i for ROU)</li> <li>- a211b_ (corrected error for POL &amp; GEO)</li> <li>- ankids (corrected error for POL &amp; GEO)</li> <li>- a1008mnth (corrected error for NGR &amp; BEL)</li> <li>- a108 (now available for SWE)</li> </ul>	

- a109\_1 (now available for SWE)
- a109\_2 (now available for SWE)
- a149 (now available for SWE)
- a309 (now available for SWE)
- aregion (now available for SWE)
- a620\_ (corrected error for DEU & CZE)
- a402 (corrected error for POL)
- a149 (corrected error routing error in NOR)
- a344 (corrected error routing error in NOR)
- a256\_ (corrected error for POL & GEO)

Information concerning changes across different versions of GGS datasets are available in the field "Data Files Description" of each country data file available in the GGS Online Data Analysis web platform.

### **Processing Checks**

#### **DATA HARMONISATION**

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

##### 1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

##### 2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("\_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3\_# or bhg3\_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

##### 3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

##### 4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

##### 5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

##### 6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

**Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

**Notes**

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.

<b>Definition</b>	Q 001
<b>Pre-question</b>	Interviewer Instruction: Write in the time and date when the interview starts.
<b>Literal question</b>	Interview started at...on...
<b>Interviewer's instructions</b>	Interviewer Instruction: Read the following text. This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

## File : GGS\_Wave1\_V.4.3.

### # asex: Sex Respondent

Statistics [NW/ W] [Valid=189212 /-] [Invalid=0 /-]

Definition Consolidated variable.

Notes Copied from the Household grid (variable ahg4\_1).

Value	Label	Cases	Percentage
1	male	85012	44.9%
2	female	104200	55.1%
6	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # ahhtype: Household type Respondent

Information [Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=\*/96]

Statistics [NW/ W] [Valid=189212 /-] [Invalid=0 /-]

Definition Consolidated variable.

Notes  
Generated from household grid (variables ahg3\_\*).  
Respondents' households were classified into groups according to the criteria explicated below.

1 "living alone":  
If the HH grid contains only R (hhsz=1).

2 "single parent":  
If HH grid contains R, at least one child (codes 2-6), and no parent.

3 "living with parents":  
If HH grid contains R, at least one parent (codes 7, 8), and no child.

4 "single parent living with parents":  
If HH grid contains R, at least one child and one parent, but no partner.

5 "couple with no children":  
If HH grid contains R, his/her partner (code 1); no child, nor parent.

6 "couple with children"  
If HH grid contains R, his/her partner, at least one child, and no parent.

7 "couple with parents"  
If HH grid contains R, his/her partner, at least one parent, and no child.

8 "couple with parents and children"  
If HH grid contains R, his/her partner, at least one parent and one child.

9 "other types"  
HH types different from 1-8, that may include codes 9-17 on ahg3\_\* (e.g., Rs living with no relatives).

Value	Label	Cases	Percentage
1	living alone	32747	17.3%
2	single parent	12586	6.7%
3	living with parents	20017	10.6%
4	single parent living with parents	1372	0.7%
5	couple with no children	45700	24.2%
6	couple with children	68515	36.2%
7	couple with parents	1514	0.8%
8	couple with parents and children	3822	2.0%
9	other types	2939	1.6%
96	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # childprevp: any children from previous partnership

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=151122 /-] [Invalid=38090 /-]
<b>Definition</b>	Derived variable
<b>Notes</b>	"Yes" if Respondent had children with any previous partner (question 332 (a345), "Partnership history" grid); "No" otherwise.  Data not available for Australia, Hungary, Estonia or Italy.

Value	Label	Cases	Percentage
1	Yes	16003	10.6%
2	No	135119	89.4%
Sysmiss		38090	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # femage: If partnered: age of female

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 14-85] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=69524 /-] [Invalid=119688 /-]
<b>Definition</b>	Derived variable
<b>Universe</b>	If R has a partner
<b>Notes</b>	This variable indicates the age of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents age is used (aage.)  If the respondent is male and in a relationship with a female then their age is derived depending on the nature of the relationship. For a resident partner the age was copied from the Household grid (ahg5_); for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y). Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset. Note that this variable does not have a value for same-sex partnerships.

### # a107AgeR: R's age of starting to live in country of interview

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-63] [Missing=*997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=9941 /-] [Invalid=179271 /-] [Mean=20.232 /-] [StdDev=12.917 /-]
<b>Definition</b>	Derived variable from Q 107 core questionnaire
<b>Universe</b>	If code 2 on Q 105
<b>Literal question</b>	In what month and year did you first start living permanently in [country]?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the country of interview was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"  Data is not available for Estonia.

**# a150AgeR: R's age of achieving the current education level**

<b>Statistics [NW/ W]</b>	[Valid=126173 /-] [Invalid=63039 /-] [Mean=20.059 /-] [StdDev=5.836 /-]
<b>Definition</b>	Derived variable from Q 122 core questionnaire
<b>Literal question</b>	In what month and year did you reach that level?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".  Data is not available for Norway.

**# a205mnth: Personal costs for child care per month**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-1317] [Missing=*/9999997/9999998/9999999]
<b>Statistics [NW/ W]</b>	[Valid=12718 /-] [Invalid=176494 /-] [Mean=217.858 /-] [StdDev=443.638 /-]
<b>Definition</b>	Q 205 core questionnaire
<b>Universe</b>	If children younger than 14 are present in the household
<b>Literal question</b>	How much does your household usually pay per month for childcare, if anything?
<b>Notes</b>	Frequencies per week and year were converted into frequency per month. Values have been rounded to 1/10; values exceeding 1 have been rounded to the nearest integer.

**# a301AgeR: R's age at start of living with current partner**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-74] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=114497 /-] [Invalid=74715 /-] [Mean=25.084 /-] [StdDev=7.196 /-]
<b>Definition</b>	Derived variable from Q 301 core questionnaire
<b>Universe</b>	If R lives together with a partner
<b>Literal question</b>	In what month and year did you and he/she first start living together?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month when started living with current partner was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

### # a303cAgeP: Partner's age of obtaining permanent residence

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=5395 /-] [Invalid=183817 /-] [Mean=21.27 /-] [StdDev=12.089 /-]
<b>Definition</b>	Derived variable from Q 303.c core questionnaire
<b>Universe</b>	If code 2 on Q 303.a
<b>Literal question</b>	In what month and year did he/she first start living permanently in [country]?
<b>Notes</b>	Partner's time of birth was either deduced from HH grid. If information on partner's month of birth / month when partner started living permanently in country was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

### # a310: Have relationship to somebody without cohabitation

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]
<b>Statistics [NW/ W]</b>	[Valid=64840 /-] [Invalid=124372 /-]
<b>Definition</b>	Q 306 core questionnaire
<b>Universe</b>	If R does NOT have a co-resident partner
<b>Literal question</b>	Are you currently having an intimate (couple) relationship with someone you're not living with? This may also be your spouse if he/she does not live together with you. Our survey does not only cover heterosexual relationships, but also same-sex relationships. If you have a partner of the same sex, please answer the following questions as well.

Value	Label	Cases	Percentage
1	yes	12205	18.8%
2	no	52635	81.2%
7	does not know	6	
8	refusal	11	
9	no response/not applicable	314

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # a311AgeR: R's age at start of current relationship

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 10-72] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=10295 /-] [Invalid=178917 /-] [Mean=30.261 /-] [StdDev=12.743 /-]
<b>Definition</b>	Derived variable from Q 307 core questionnaire
<b>Universe</b>	If R has a non-resident partner (code 1 on Q 306)
<b>Literal question</b>	In what month and year did this relationship start?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month when started current relationship was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"
