## Generations and Gender Survey Wave 2 - Consolidated (GGS Wave 2 - Cons.)

### Overview

<b>Identification</b>	GGSW2.Cons.
-----------------------	-------------

#### Abstract

The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.

In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion".

The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:

- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.
- A broad age range. It includes respondents between the ages of 18 and 80.
- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.
- A large sample size. It has an average of 9,000 respondents per country at Wave 1.
- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.
- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.

### Scope & Coverage

<b>Keywords</b>	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender Relations, Intergenerational exchange, Informal and formal care, Well being and health, Grandparenthood, Economic activity, Retirement
-----------------	---

<b>Countries</b>	
------------------	--

### Accessibility

<b>Access Authority</b>	UNECE Population Unit - Palais des Nations - CH-1211 Geneva 10 - Switzerland. Tel: +41 22 917 24 77 - fax: +41 22 917 01 07 , <a href="http://www.unece.org/pau/">http://www.unece.org/pau/</a> , <a href="mailto:ggp@unece.org">ggp@unece.org</a>

#### Access Conditions

In order to access, it is necessary to subscribe to the GGP Data User Space, and to follow the instructions available on the GGP data access webpage.

#### Citation Requirements

In any work emanating from research based on the Generations and Gender Survey micro-data, I will acknowledge that these data were obtained from the GGP Data Archive and refer to the publication that describes the model survey instruments: United Nations 2005. Generations & Gender Programme: Survey Instruments. New York and Geneva: UN, 2005

## **Rights & Disclaimer**

### **Disclaimer**

The authors and producers bear no responsibility for the uses of the GGS data, or for interpretations or inferences based on these uses. The producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

# Files Description

Dataset contains 1 file(s)

<b>GGW_Wave2_V.1.3.</b>	
<b># Cases</b>	73881
<b># Variable(s)</b>	2075
<p><b><u>File Content</u></b></p> <p>This study includes the consolidated GGS Wave 2 datasets. It contains all the GGS Wave 2 released datasets, except for Germany Turkish-subsample. All the available variables are included (also the country specific variables).</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Activity and Education History, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><b><u>Producer</u></b></p> <p>The file is produced centrally by the Netherlands Interdisciplinary Demographic Institute (NIDI, The Netherlands), in collaboration with the Survey Department of the "Institut national d'études démographiques" (INED, France).</p>	
<p><b><u>Version</u></b></p> <p>Harmonized dataset, GGS Wave2, version 1.3.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.3 (August 2016)</p> <p>Correction of the following variables that were previously erroneous: b343_*, bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.2 (April 2015)</p> <p>The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.</p> <p>- Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrespartafterw1, blivingwithpartner, bchildprevp, bnchildprevp, bfemage, bmaleage, bfemeduc , , bmaleeduc, bfertintent, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl , bhhtype.</p>	

- Variables derived from month and year variable: b121AgeR, b150AgeR, bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Agb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP, b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.
- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour\_x.
- Variables derived from frequency and unit variables: b203c\_xw, b204c\_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.
- Occupation variables recoded into ISCO-88 1 digit: b828\_1dig, b832\_1dig, b861\_1dig, b917\_1dig, b921\_1dig, b933\_1dig.
- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime\_1801, bnumparttime\_1802, bnumpartfulltime\_1803, bnumfulltime\_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876\_xAgeR, bn877\_xAgeR, bn878xAgeR, bn879\_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

### **Processing Checks**

#### **DATA HARMONISATION**

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

##### 1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

##### 2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("\_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3\_# or bhg3\_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

##### 3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

##### 4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

##### 5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

#### 6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

#### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

#### **Notes**

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.

#### WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

#### WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

# Variables List

Dataset contains 2075 variable(s)

## File : GGS\_Wave2\_V.1.3.

### # brid: R identification number (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-20339870013] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=73881 /-] [Invalid=0 /-] [Mean=1320963470.969 /-] [StdDev=3909449440.758 /-]
<b>Notes</b>	Matching ID with arid in Wave 1

### # bweight: Weight (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0.102-329892516] [Missing=*/9999997/9999998/9999999]
<b>Statistics [NW/ W]</b>	[Valid=59330 /-] [Invalid=14551 /-] [Mean=3934249.221 /-] [StdDev=15229537.032 /-]
<b>Definition</b>	Standardized weight based on the country specific population weight.

### # bweight\_pop: Responding person population weight (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-20000] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=6143 /-] [Invalid=67738 /-] [Mean=1283.468 /-] [StdDev=1044.145 /-]
<b>Definition</b>	This is the cross-section responding person population weight rescaled to sum to the number of responding persons in the relevant wave. Use this weight when the statistical package requires the sum of the weights to be the sample size (_hhwtrp in original HILDA file). Weighted by State; Sex by broad age; State by labour force status; Marital status; and Occupation

### # bweight\_sample: Responding person sample weight (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-15.0615158081055] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=6143 /-] [Invalid=67738 /-] [Mean=0.967 /-] [StdDev=0.786 /-]
<b>Definition</b>	The responding person weight is the cross-section population weight (_hhwtrp in original HILDA file) for all people who responded in the relevant wave (i.e. they provided a personal interview). Weighted by State; Sex by broad age; State by labour force status; Marital status; and Occupation.

### # bweight\_1501: Country specific population weight (W2)

### # bweight\_1802: weight to individual sample with demographic adjustments (W2)

**Definition** Country-specific weight: weight to individual sample with demographic adjustments.

### # bweight\_1803: weight to demographic and selective non-response adjustments (W2)

**Information** [Type= discrete] [Format=numeric] [Range= 0-8.77226638793945] [Missing=\*]

**Statistics [NW/ W]** [Valid=6089 /-] [Invalid=67792 /-] [Mean=1 /-] [StdDev=0.629 /-]

**Definition** Country-specific weight: weight to demographic and selective non-response adjustments.

### # bmonth: Mnth of interview (W2)

**Information** [Type= discrete] [Format=numeric] [Range= 1-2401] [Missing=\*/97/98/99]

**Statistics [NW/ W]** [Valid=73849 /-] [Invalid=32 /-]

**Definition** Q 001

**Pre-question** Interviewer Instruction: Write in the time and date when the interview starts.

**Literal question** Interview started at...on...

**Interviewer's instructions** Interviewer Instruction: Read the following text.

This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.

The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.

Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.

We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.

### # bchildprevp: Any children from previous partnership (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-99] [Missing=* /6]
<b>Statistics [NW/ W]</b>	[Valid=50621 /-] [Invalid=23260 /-]
<b>Definition</b>	Derived variable
<b>Notes</b>	"Yes" if Respondent reported to have had children with any previous co-resident partner at wave 1 (variable childprev) AND/OR at wave 2 (variable bnchildprevp); "No" otherwise.

Value	Label	Cases	Percentage
1	yes	6850	13.5%
2	no	43771	86.5%
6	unknown	0	
Sysmiss		23260	

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # bfemage: If partnered: age of female (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 4-101] [Missing=* /997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=46242 /-] [Invalid=27639 /-] [Mean=46.307 /-] [StdDev=14.407 /-]
<b>Definition</b>	Derived variable from consolidated variable bage, bsex, b373y, b384.
<b>Universe</b>	If R has a partner
<b>Notes</b>	For a resident partner the age was copied from the Household grid; for a non resident partner the age was calculated as: year of interview MINUS question 333 (variable b315y). Rs with non-resident partners are coded with "999 - not applicable/no response", when variable b315y is not available in the dataset. Note that this variable does not have a value for same-sex partnerships.

# bndurstudentstatus: Total duration (in month) of Rs working statuses as student, in school, in vocat (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-768] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=44671 /-] [Invalid=29210 /-] [Mean=57.849 /-] [StdDev=60.965 /-]
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?
<b>Notes</b>	Total duration (in month) of Rs working statuses as student, in school, in vocational training since age 16 (code 1 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
<b># bnduremplstatus: Total duration (in month) of Rs working statuses as employed since age 16 (W2)</b>			
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-780] [Missing=*/997/998/999]		
<b>Statistics [NW/ W]</b>	[Valid=44737 /-] [Invalid=29144 /-] [Mean=181.221 /-] [StdDev=162.252 /-]		
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?		
<b>Notes</b>	Total duration (in month) of Rs working statuses as employed since age 16 (code 2 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

<b># bndurselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16 (W2)</b>			
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999]		
<b>Statistics [NW/ W]</b>	[Valid=17481 /-] [Invalid=56400 /-] [Mean=37.624 /-] [StdDev=85.154 /-]		
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?		
<b>Notes</b>	Total duration (in month) of Rs working statuses as self employed since age 16 (code 3 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

**# bndurhelpfamstatuses: Total duration (in month) of Rs working statuses as helping family member in a f (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-677] [Missing=* /997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=14070 /-] [Invalid=59811 /-] [Mean=13.274 /-] [StdDev=53.333 /-]
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
<b>Literal question</b>	When did this period of [activity] start?

**# bndurhelpfamstatuses: Total duration (in month) of Rs working statuses as helping family member in a f (W2)**

When did this period of [activity] end?

**Notes**

Total duration (in month) of Rs working statuses as helping family member in a family business or farm since age 16 (code 4 on Q 801, variable bn871\_\*) . If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years\*12) values have been put as equal to this difference.

# **bn durunempl statuses: Total duration (in month) of Rs working statuses as unemployed since age 16 (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-720] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=20335 /-] [Invalid=53546 /-] [Mean=38.387 /-] [StdDev=65.877 /-]
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?
<b>Notes</b>	Total duration (in month) of Rs working statuses as unemployed since age 16 (code 5 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
<b># bndurretiredstatus: Total duration (in month) of Rs working statuses as retired since age 16 (W2)</b>			
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-660] [Missing=*/997/998/999]		
<b>Statistics [NW/ W]</b>	[Valid=14590 /-] [Invalid=59291 /-] [Mean=65.516 /-] [StdDev=89.389 /-]		
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?		
<b>Notes</b>	Total duration (in month) of Rs working statuses as retired since age 16 (code 6 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

<b># bndurmilitarystatuses: Total duration (in month) of Rs working statuses as in military or social servc (W2)</b>			
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-487] [Missing=*/997/998/999]		
<b>Statistics [NW/ W]</b>	[Valid=15512 /-] [Invalid=58369 /-] [Mean=13.255 /-] [StdDev=19.032 /-]		
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?		
<b>Notes</b>	Total duration (in month) of Rs working statuses as in military or social service since age 16 (code 7 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

**# bndurmatleavestatuses: Total duration (in month) of Rs working statuses as in maternity leave since age (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-488] [Missing=*997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=43433 /-] [Invalid=30448 /-] [Mean=1.46 /-] [StdDev=10.158 /-]
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?
<b>Notes</b>	Total duration (in month) of Rs working statuses as in maternity leave since age 16 (code 9 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

<b># bndurparleavestatuses: Total duration (in month) of Rs working statuses as in parental leave, care leav (W2)</b>			
<b>Value</b>	<b>Label</b>	<b>Cases</b>	<b>Percentage</b>
Systemmiss		37570	
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
<b># bndurilldisabledstatuses: Total duration (in month) of Rs working statuses as ill or disabled for a long t (W2)</b>			
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999]		
<b>Statistics [NW/ W]</b>	[Valid=8259 /-] [Invalid=65622 /-] [Mean=27.508 /-] [StdDev=68.717 /-]		
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?		
<b>Notes</b>	Total duration (in month) of Rs working statuses as ill or disabled for a long time or permanently since age 16 (code 11 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years\*12) values have been put as equal to this difference.

**# bndurparttime: Total duration (in month) of Rs part-time periods of work (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-265] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=16385 /-] [Invalid=57496 /-] [Mean=0.231 /-] [StdDev=4.705 /-]
<b>Definition</b>	Derived variable from Q 805, Q 806 and Q 807 (variables bn875_*, bn876m_*, bn876y_*, bn877m_*, bn877y_*).
<b>Universe</b>	If code 3 on Q 805
<b>Literal question</b>	When did the first/next period of part time work start? When did this period of part time work end?
<b>Notes</b>	Total duration (in month) of Rs part-time periods of work (code 3 on Q 805, variable bn875_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

<b>Universe</b>	If code 2 on Q 331.a
<b>Literal question</b>	In what month and year did he/she first start living permanently in [COUNTRY]?
<b>Notes</b>	Non Resident Partner's time of birth was deducted from the answer to Q 330. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b374cAgeP: Partner's age of obtaining permanent residence (W2)	
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=1474 /-] [Invalid=72407 /-]
<b>Definition</b>	Derived variable from consolidated variables b374cm and b374cy (variables obtained from Q 322c and 331c: variables b303cm, b316cm, b303cy, b316cy; if partner is the same then W1 the data is merged from W1, variables a303cm and a303cy).
<b>Universe</b>	If R has a partner (co-resident or non-resident)
<b>Literal question</b>	In what month and year did he/she first start living permanently in [COUNTRY]?
<b>Notes</b>	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 330. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

<b>Universe</b>	If code 0 on Q 616
<b>Literal question</b>	In what month and year did you last use or do anything to prevent pregnancy?
<b>Notes</b>	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 330 (non resident partner). If information on the month of birth / month at last use of anything to prevent pregnancy was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b871AgeR: R's age at start of current activity status (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=38399 /-] [Invalid=35482 /-]
<b>Definition</b>	Derived variable generated from consolidated variables a871m and a871y (obtained from Q 930, variables b833m and b833y)
<b>Literal question</b>	In what month and year did you start this job or business?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b914AgeP: Partner's age of becoming a homemaker (W2)

<b>Definition</b>	Derived variable from Q 1014
<b>Universe</b>	If code 8 on Q 1001
<b>Literal question</b>	Since what month and year is your partner/spouse a homemaker?
<b>Notes</b>	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 330 (non resident partner). If information on the month of birth / month of becoming a homemaker was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*97/98/99]
<b>Statistics [NW/ W]</b>	[Valid=6960 /-] [Invalid=66921 /-]
<b>Definition</b>	Q 1017
<b>Universe</b>	R is partnered, partner is unemployed / student / retired / ill or permanently disabled / homemaker / in military or social service and had a job directly before this current status.
<b>Pre-question</b>	I would now like to ask a few questions about your partner's/spouse's previous job or business. If he/she was engaged in two or more jobs or businesses, I would like you to tell me only about the one in which he/she spent most of his/her working hours.
<b>Literal question</b>	What was his/her last occupation? Please describe the principal activity he/she performed.
<b>Notes</b>	Occupations were re-coded according to 1 digit ISCO codes

# b938\_2810: Number payments received partner last 12 mnths type income grant (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0.35865-99999999] [Missing=*/99999997/99999998/99999999]
<b>Statistics [NW/ W]</b>	[Valid=10 /-] [Invalid=73871 /-]
<b>Definition</b>	Country specific variable for CZE adapted from Q 1038. In CZE a specific question asks about partner's net amount of payment in the framework of a grant.
<b>Universe</b>	If R is partnered
<b>Literal question</b>	What was the average net amount of this payment?

<b># b938_2810: Number payments received partner last 12 mnths type income grant (W2)</b>			
		For payment types 1 and 2: If your partner/spouse is working with an employer, please include also earnings from any overtime he/she normally did. Please give me the net-amount, that is, the take-home pay.

<b>Information</b>		[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*]	
<b>Statistics [NW/ W]</b>		[Valid=6143 /-] [Invalid=67738 /-]	
<b>Definition</b>		Country-specific variable adapted from Q 1403. AUS it differs because it is asked to evaluate R's cooperation according to a set of pre-established list of adjectives.	
<b>Literal question</b>		All in all, how willing was the respondent to answer the questions?	
<b>Value</b>	<b>Label</b>	<b>Cases</b>	<b>Percentage</b>
1	excellent	5171	84.2%
2	good	887	14.4%
3	fair	65	1.1%
4	poor	9	0.1%
5	very poor	4	0.1%
7	does not know	0	
8	refusal	7	0.1%
9	not applicable/no response	0	
Sysmiss		67738	
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
<b># bn1404: Reliability of R's information (W2)</b>			
<b>Information</b>		[Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*97/98/99]	
<b>Statistics [NW/ W]</b>		[Valid=31374 /-] [Invalid=42507 /-]	
<b>Definition</b>		Q 1404	
<b>Literal question</b>		How would you judge the information the respondent gave?	
<b>Value</b>	<b>Label</b>	<b>Cases</b>	<b>Percentage</b>
1	not reliable at all	20	0.1%
2		51	0.2%

**# bn1404: Reliability of R's information (W2)**

Value	Label	Cases	Percentage
3		180	0.6%
4		270	0.9%
5		789	2.5%
6		1166	3.7%
7		2416	7.7%
8		4569	14.6%
9		7811	24.9%
10	very reliable	14102	44.9%
97	does not know	0	
98	refusal	0	
99	no response/not applicable	60	
Sysmiss		42447

**# bn1405: R same person than in Wave 1 (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*97/98/99]
<b>Statistics [NW/ W]</b>	[Valid=34170 /-] [Invalid=39711 /-]
<b>Definition</b>	Q 1405
<b>Literal question</b>	Would you say that the respondent answering to you was also interviewed in the previous wave 3 years ago?

Value	Label	Cases	Percentage
1	I am convinced that she/he was	28511	83.4%
2	It is very likely that she/he was	3937	11.5%
3	I am not certain	1060	3.1%
4	It is very likely that she/he was not	459	1.3%
5	I am convinced that she/he was not	203	0.6%
97	does not know	0	
98	refusal	0	
99	no response/not applicable	7
