Generations and Gender Survey Sweden Wave 1 (GGS Sweden Wave 1)

Svenska familjer i tiden

Overview	
Identification	GGSW1.29
Abstract	<p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> - Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets. - A broad age range. It includes respondents between the ages of 18 and 80. - A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals. - A large sample size. It has an average of 9,000 respondents per country at Wave 1. - A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior. - Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.
Kind of Data	Survey data plus population register
Unit of Analysis	Individuals

Scope & Coverage	
Keywords	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender Relations, Intergenerational exchange, Informal and formal care, Well being and health, Grandparenthood, Economic activity, Retirement
Time Period(s)	2012-2013
Countries	Sweden
Geographic Coverage	The whole country.
Universe	Target Population: Individuals in Sweden age 18-79

Producers & Sponsors	
Primary Investigator(s)	Elizabeth Thomson, Stockholm University Demography Unit (SUDA) Gunnar Andersson, Stockholm University Demography Unit (SUDA)
Other Producer(s)	Stockholm University Demography Unit (SUDA) , Development and management Linnaeus Center for Social Policy and Family Dynamics in Europe (SPaDE) , Development and management Statistics Sweden Survey Unit , Sampling, data collection and production

Funding Agency/ies	Swedish Research Council (VR) Riksbankens Jubileumsfond (RJ) Swedish Research Council (VR) Swedish Research Council (VR)
---------------------------	---

Sampling

Sampling Procedure

1. Sampling frame

1.1 Type of frame: Register of the Total Population (RTB)

1.2 Frame coverage: The Frame (RTB) covers all individuals in Sweden covered by the civil registration. Statistics Sweden's RTB receive daily updates from The Swedish Tax Agency.

1.3 Frame size: A subset of RTB, age 18-79 (7 128 847 individuals)

1.4 Level of units available: 7 128 847 individuals

2. Sampling method

2.1 Sampling method type: Proportional-to-size sampling with a simple random sampling (SI) within strata. (one-stage sampling; individual level)

2.2 Sampling stage definition

- PSU: individual

- SSU: NA

- TSU: NA

2.3 Sampling stage size

- PSU: individuals

- SSU: NA

- TSU: NA

2.4 Unit selection: individuals

2.5 Final stage unit selection: individuals

2.6 Within household unit selection: out of scope

2.7 Stratification: The frame is divided into 8 strata by sex (male, female), age (18-49, 50-79) and residence (three major cities, other).

2.8 Sample size

- Starting size sample: 18000 individuals

- Aimed total size at Wave 1: 18000 individuals

- Aimed total size at Wave 3: NA

2.9 Estimated Non-response

- Yearly attrition: NA

- Non response measures: The total non response rate for Wave 1 is 45,4 % (excluding overcoverage). The non response rate is calculated as follows: number of non-respondents / (the sample size-number of overcoverage units). The overcoverage is negligible in this survey.

- Within household non-responses measures: out of scope

Response Rate

WAVE 1

Frequency of final disposition codes:

I = Complete interview: 9665 interviews, response rate = $9665 / (18000-326) = 54,6 \%$

P = Partial interview: NA

NE = Not eligible: 326

NC = Non-contact: 3210, non-contact rate = $3210 / (18000-326) = 18,2 \%$

R = Refusal: 3939 (refusal rate = $3939 / (18000-326) = 22,3 \%$

O = Other non-response: 860, "other non-response rate" = $860 / (18000-326) = 4,9 \%$

UC = Unknown eligibility, contacted/: NA

UN = Unknown eligibility, non-contact: NA

eC = Estimated proportion of contacted cases of unknown eligibility that are eligible: NA

eN = Estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

Weighting

The estimation procedure generates calibration weights based on the inclusion probabilities and auxiliary information (mainly from RTB).

Data Collection

Data Collection Dates	Wave 1: start 2012-04 Wave 1: end 2013-04
Data Collection Mode	- Telephone interview (CATI WinDATI at Statistics Sweden) and Registers for information on: family of origin, current partner, children, partner history, fertility intentions, education, employment, occupation and income (respondent and current partner). - Self-administered postal questionnaire or online alternative for information on: household economy, household work, decision making, social and economic exchange, Health and Wellbeing, values, beliefs, Subjective norms, and intentions.

Data Collection Notes

1. Interviewers
 - 1.1 Total number of interviewers: 59
 - 1.2 Number of interviewers in the field: All interviewers were located in Stat Sweden's CATI-center
 - 1.3 Network organization: See 1.2
 - 1.4 Working arrangement of interviewers: Part-time (0.50-0.80 of full-time)
 - 1.5 Payment of interviewers: Monthly salary
2. Interviewer training:
 - 2.1 General interviewing: Each interviewer have an initial one-week basic course. After one year the interviewers has a continuation course.
 - 2.2 Survey specific: In this survey, all interviewers followed a theoretical study-specific training.
 - 2.3 Length: 12 hours (theory and practice)
 - 2.4 Control of performance: Monitoring (during the education phase) and control and feedback based on process data (paradata) from the CATI-system.
 - 2.5 Interviewer survey: NO
3. Contact protocols
 - 3.1 Advance letter: All sample units recieved an advance letter.
 - 3.2 Cold contacts: Telephone
 - 3.3 Scheduling / scattering: Yes. Call attempts were distributed over all weekdays, weekends (including Sundays) and during the days across morning, afternoon and evening (until 9 p.m.).
 - 3.4 Contact history: DK
 - 3.5 Min number of contacts: 1
 - 3.6 Max number of contacts: 12
4. Questionnaire localization
 - 4.1 Validation: Expert review of the questionnaire by Statistics Sweden's Cognitive Methods Unit
 - 4.2 Pre-test: Yes. Pilot study using a 400-person sampling frame with the same design as the full survey.
 - 4.3 Length of interview: The average time for the telephone interviews was 26 minutes and 28 seconds.

Questionnaires

Structured questionnaire in Swedish CATI-based.

Data Collector(s)	Statistics Sweden (SCB)
--------------------------	-------------------------

Supervision

1. Dealing with nonresponse
 - 1.1 Screening: DK
 - 1.2 Refusal conversion: Yes, in special follow-up processes.
 - 1.3 Incentives: No

2. Tracking of sampled units

2.1 Respondent contact information: Address, telephone numbers, Id-identification including family members.

2.2 Other contact information: Statistics Sweden is allowed to get contact information from several other authorities.

2.3 Cards: No

2.4 Additional surveys: No

2.5 Administrative records: Contact information from employers from Register of Statement of incomes.

<u>Access Conditions</u>	
In order to access, it is necessary to subscribe to the GGP Data User Space, and to follow the instructions available on the GGP data access webpage.	
<u>Citation Requirements</u>	
In any work emanating from research based on the Generations and Gender Survey micro-data, I will acknowledge that these data were obtained from the GGP Data Archive and refer to the publication that describes the model survey instruments: United Nations 2005. Generations & Gender Programme: SurveyInstruments. New York and Geneva: UN, 2005	

Rights & Disclaimer**Disclaimer**

The authors and producers bear no responsibility for the uses of the GGS data, or for interpretations or inferences based on these uses. The producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

Files Description

Dataset contains 1 file(s)

GGG_Wave1_Sweden_V.4.2.	
# Cases	9688
# Variable(s)	1113
<p><u>File Content</u> VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a19_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><u>Producer</u> The file is produced centrally by the Netherlands Interdisciplinary Demographic Institute (NIDI, The Netherlands), in collaboration with the Survey Department of the "Institut national d'études démographiques" (INED, France).</p>	
<p><u>Version</u> Harmonized dataset, GGS Sweden Wave1, version 4.2.</p> <p>FIRST DATASET RELEASED: V. 4.2. (June 2015).</p>	
<p><u>Processing Checks</u> DATA HARMONISATION</p> <p>The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:</p> <ol style="list-style-type: none"> 1. Label checks This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets. 2. Dealing with grids The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there 	

may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.

Variables Group(s)

Dataset contains 91 group(s)

Information [Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/97/98/99]

Statistics [NW/ W] [Valid=9688 /-] [Invalid=0 /-]

Definition Q 001

Pre-question Interviewer Instruction: Write in the time and date when the interview starts.

Literal question Interview started at...on...

Interviewer's instructions Interviewer Instruction: Read the following text.
This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

Value	Label	Cases	Percentage
1	January	863	8.9%
2	February	569	5.9%
3	March	360	3.7%
4	April	472	4.9%
5	May	648	6.7%

asex: Sex Respondent

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483625] [Missing=*/6]
Statistics [NW/ W]	[Valid=9688 /-] [Invalid=0 /-]
Definition	Consolidated variable.
Notes	Copied from the Household grid (variable ahg4_1).

Value	Label	Cases	Percentage
1	male	4697	48.5%
2	female	4991	51.5%
6	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

ahhtype: Household type Respondent

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/96]
Statistics [NW/ W]	[Valid=9688 /-] [Invalid=0 /-]
Definition	Consolidated variable.
Notes	Generated from household grid (variables ahg3_*). Respondents' households were classified into groups according to the criteria explicated below. 1 "living alone": If the HH grid contains only R (hhsz=1). 2 "single parent": If HH grid contains R, at least one child (codes 2-6), and no parent. 3 "living with parents":

File : GGS_Wave1_Sweden_V.4.2.

ahhtype: Household type Respondent

If HH grid contains R, at least one parent (codes 7, 8), and no child.
 4 "single parent living with parents":
 If HH grid contains R, at least one child and one parent, but no partner.
 5 "couple with no children":
 If HH grid contains R, his/her partner (code 1); no child, nor parent.
 6 "couple with children"
 If HH grid contains R, his/her partner, at least one child, and no parent.
 7 "couple with parents"
 If HH grid contains R, his/her partner, at least one parent, and no child.
 8 "couple with parents and children"
 If HH grid contains R, his/her partner, at least one parent and one child.
 9 "other types"
 HH types different from 1-8, that may include codes 9-17 on ahg3_* (e.g., Rs living with no relatives).

Value	Label	Cases	Percentage
1	living alone	1802	18.6%
2	single parent	489	5.0%
3	living with parents	679	7.0%
4	single parent living with parents	12	0.1%
5	couple with no children	3382	34.9%
6	couple with children	3189	32.9%
7	couple with parents	25	0.3%
8	couple with parents and children	27	0.3%
9	other types	83	0.9%
96	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

ahhsiz: Household size including Respondent

Information	[Type= discrete] [Format=numeric] [Range= 1-13] [Missing=*96]
Statistics [NW/ W]	[Valid=9688 /-] [Invalid=0 /-]
Definition	Consolidated variable.
Notes	Generated from household grid (variables ahg1_*).

Value	Label	Cases	Percentage
1		1802	18.6%
2		3859	39.8%
3		1723	17.8%
4		1587	16.4%

numdivorce: Total number of partnerships ending in divorce

Information	[Type= discrete] [Format=numeric] [Range= 0-3] [Missing=*]
Statistics [NW/ W]	[Valid=9688 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	The number of previous partners with whom Respondent was married AND broke up (code 1 on question 327 (a335a) and code 1 on question 330 (a343), "Partnership history" grid). Not available for Australia as partnership history grid differs in Australian survey.

Value	Label	Cases	Percentage
0		8111	83.7%
1		1399	14.4%
2		164	1.7%
3		14	0.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

nummarriage: Total number of marriages

Information	[Type= discrete] [Format=numeric] [Range= 0-3] [Missing=*]
Statistics [NW/ W]	[Valid=9688 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	The number of previous partners with whom Respondent was married (code 1 on question 327 "Partnership history" grid) PLUS the current marriage if one exists (code 1 on question 302 / variable a302a OR code 1 on question 310 / variable a314a).

Value	Label	Cases	Percentage
0		3906	40.3%

File : GGS_Wave1_Sweden_V.4.2.

nummarriage: Total number of marriages

Value	Label	Cases	Percentage
1		5101	52.7%
2		631	6.5%
3		45	0.5%
4		5	0.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

numpartnerships: Total number of partnerships

Information	[Type= discrete] [Format=numeric] [Range= 0-4] [Missing=*]
Statistics [NW/ W]	[Valid=9688 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	The total number of partnership dissolutions (see variable numdissol) PLUS the current partnership if one exists (partner is present in the Household grid). Note that this variable only refers to resident partners, past and present. Not available for Australia as partnership history grid differs in Australian survey

Value	Label	Cases	Percentage
0		1356	14.0%
1		5183	53.5%
2		2378	24.5%
3		621	6.4%
4		122	1.3%
5		20	0.2%

9		1	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

childprevp: any children from previous partnership

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=9688 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent had children with any previous partner (question 332 (a345), "Partnership history" grid); "No" otherwise. Data not available for Australia, Hungary, Estonia or Italy.

Value	Label	Cases	Percentage
1	Yes	1989	20.5%
2	No	7699	79.5%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

femage: If partnered: age of female

Information	[Type= discrete] [Format=numeric] [Range= 14-85] [Missing=*]
Statistics [NW/ W]	[Valid=3870 /-] [Invalid=5818 /-]
Definition	Derived variable
Universe	If R has a partner

File : GGS_Wave1_Sweden_V.4.2.

femage: If partnered: age of female

Notes	<p>This variable indicates the age of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents age is used (aage.)</p> <p>If the respondent is male and in a relationship with a female then their age is derived depending on the nature of the relationship. For a resident partner the age was copied from the Household grid (ahg5_); for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y).</p> <p>Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset.</p> <p>Note that this variable does not have a value for same-sex partnerships.</p>

numbiol: Total number of biological children

Information	[Type= discrete] [Format=numeric] [Range= 0-12] [Missing=*]
Statistics [NW/ W]	[Valid=9688 /-] [Invalid=0 /-]
Definition	Derived variable
Literal question	The number of biological children of the respondent (with the current or with former partner).
Notes	For resident children, copied from the Household grid (code 2 or 3 on variable ahg3_*); for non-resident children, copied from question a213 (code 1 on variable a213_*). Note that this variable refers to biological children of the respondent, coresident and non-resident, with the current partner or with an other partner.

Value	Label	Cases	Percentage
0		6111	63.1%
1		1389	14.3%

a107AgeR: R's age of starting to live in country of interview

Information	[Type= discrete] [Format=numeric] [Range= 0-63] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=1123 /-] [Invalid=8565 /-] [Mean=21.419 /-] [StdDev=11.583 /-]
Definition	Derived variable from Q 107 core questionnaire
Universe	If code 2 on Q 105
Literal question	In what month and year did you first start living permanently in [country]?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the country of interview was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December" Data is not available for Estonia.

Definition	Derived variable from Q 122 core questionnaire

a150AgeR: R's age of achieving the current education level

Literal question	In what month and year did you reach that level?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". Data is not available for Norway.

Universe	If R lives together with a partner		

a301AgeR: R's age at start of living with current partner

Literal question	In what month and year did you and he/she first start living together?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when started living with current partner was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a303cAgeP: Partner's age of obtaining permanent residence

Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=0 /-] [Invalid=9688 /-]
Definition	Derived variable from Q 303.c core questionnaire
Universe	If code 2 on Q 303.a
Literal question	In what month and year did he/she first start living permanently in [country]?
Notes	Partner's time of birth was either deduced from HH grid. If information on partner's month of birth / month when partner started living permanently in country was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

Value	Label	Cases	Percentage
997	does not know	0

Universe	If R does NOT have a co-resident partner
Literal question	Are you currently having an intimate (couple) relationship with someone you're not living with? This may also be your spouse if he/she does not live together with you. Our survey does not only cover heterosexual relationships, but also same-sex relationships. If you have a partner of the same sex, please answer the following questions as well.

Value	Label	Cases	Percentage
1	yes	907	29.7%
2	no	2147	70.3%
7	does not know	6	
8	refusal	5	
9	no response/not applicable	0	
Sysmiss		6623	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

a311AgeR: R's age at start of current relationship

Information	[Type= discrete] [Format=numeric] [Range= 10-72] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=816 /-] [Invalid=8872 /-] [Mean=34.684 /-] [StdDev=15.876 /-]
Definition	Derived variable from Q 307 core questionnaire
Universe	If R has a non-resident partner (code 1 on Q 306)
Literal question	In what month and year did this relationship start?

a311AgeR: R's age at start of current relationship

Notes

R's time of birth was deducted from HH grid. If information on the month of birth / month when started current relationship was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a374cAgeP: Partner's age of obtaining permanent residence

Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=733 /-] [Invalid=8955 /-] [Mean=23.277 /-] [StdDev=11.51 /-]
Definition	Consolidated variable from variables a303AgeP and a316cAgeP (derived variables from Q 304.c and Q 312.c core questionnaire).
Universe	If R's partner not born in [country]
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?
Notes	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a871AgeR: R's age at start of current activity status

Information	[Type= discrete] [Format=numeric] [Range= 0-73] [Missing=*997/998/999]
Statistics [NW/ W]	[Valid=8688 /-] [Invalid=1000 /-] [Mean=37.727 /-] [StdDev=16.144 /-]
Definition	Generated from consolidated variables a871m and a871y.
Literal question	In what month and year did you start this leave? In what month and year did you become unemployed? Since what month and year are you a student, studying at school, or in vocational training? In what month and year did you retire? Since what month and year are you a homemaker? In what month and year did you start this job or business?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December" This variable is not available for Belgium.

# a941AgeP: Partner's age at start of current activity status			
Information	[Type= discrete] [Format=numeric] [Range= 0-72] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=1531 /-] [Invalid=8157 /-] [Mean=53.462 /-] [StdDev=15.951 /-]		
Definition	Generated from consolidated variables a941m and a941y.		
Universe	If R has a partner.		
Literal question	In what month and year did your partner/spouse start this leave? In what month and year did he/she become unemployed? Since what month and year is your partner/spouse a student, in school, or in vocational training? In what month and year did your partner/spouse retire? Since what month and year is your partner/spouse a homemaker?		
Notes	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 311 (non resident partner). If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". In Belgium if the partner is still in education (a941y==2301) then the variable was coded as system missing.

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]		
Statistics [NW/ W]	[Valid=6149 /-] [Invalid=3539 /-]		
Definition	Q 1001.a core questionnaire Country specific additional value: - ITA: "1701-no". - NLD: "1801-no".		
Pre-question	In the following I would like to talk with you about the financial situation of your household - about the things your household possesses and can afford as well as the income and transfers your household receives. Please look at this list. For each item, please indicate whether or not your household possesses it. It does not matter whether the item is owned, rented, or otherwise provided for your use. If you do not have an item, please indicate whether you would like to have it but cannot afford it, or do not have it for other reasons, e.g. you don't want or need it. Card 1001

Universe	If R does not currently live with parents/a parent
Literal question	In what month and year did you for the first time start living separately from your parents for at least three months?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when first time living separately from parents was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"
