Generations and Gender Survey Australia Wave 1 & Wave 2 (GGS Australia Wave 1 & Wave 2)

Contained in "*The Household, Income and Labour Dynamics in Australia Survey*"

Overview	
Identification	GGSW1.W2.24
<p>Abstract</p> <p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> - Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets. - A broad age range. It includes respondents between the ages of 18 and 80. - A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals. - A large sample size. It has an average of 9,000 respondents per country at Wave 1. - A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior. - Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts. 	
Kind of Data	Survey data
Unit of Analysis	Individuals

Scope & Coverage

Scope

The GGS in Australia was "piggybacking" on the Household Income and Labour Dynamics in Australia (HILDA) survey. The HILDA Survey is a panel household survey that started in 2001, with a wave each following year.

- GGS Wave 1 corresponds to HILDA Wave 5 (2005-2006).
- GGS Wave 2 corresponds to HILDA Wave 8 (2008-2009).

Keywords	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
Time Period(s)	2005-2009
Countries	Australia

Geographic Coverage

It covers the six Australian states and two territories outside the borders of the states, excluding remote and sparsely populated areas.

Universe

The reference population for the HILDA survey wave 1 was all members aged 15+ of private dwellings in Australia, with the following exceptions:

- diplomatic personnel of overseas governments, customarily excluded from censuses and surveys;

- overseas residents in Australia (i.e., persons who had stayed or intended to stay in Australia for less than one year);
- members of non-Australian defence forces (and their dependents) stationed in Australia; and
- people living in remote and sparsely populated areas.

To ensure that all members of the in-scope population have the same probability of selection, dwellings that are not primary places of residence (e.g., holiday homes) were also excluded.

All members of the households providing at least one interview in wave 1 form the basis of the panel to be pursued in each subsequent wave.

Funding Agency/ies	Australian government through the Department of Families, Housing, Community Services and Indigenous Affairs

Sampling

Sampling Procedure

SAMPLING PROCEDURE FOR HILDA WAVE 1

1. Sampling frame

1.1 Type of frame: List of geographic units - 1996 Census districts (CDs). This frame excluded CDs that had zero land area (usually used for homeless people or off-shore/migratory people) or were remote or sparsely populated.

1.2 Frame coverage: NA

1.3 Frame size: From 34,422 Census Districts in 1996, CDs defined as remote or sparsely populated were excluded. In addition CDs that had zero land area were also excluded. A sample of 488 CDs were then selected.

1.4 Level of units available: Dwelling

2. Sampling method

2.1 Sampling method type: Multistage

2.2 Sampling stage definition

- PSU: Census District

- SSU: Dwellings

- TSU: Households

2.3 Sampling stage size

- PSU: 448

- SSU: 12,252 (22-34 dwellings chosen within each census district depending on the expected response and occupancy rates of the area)

- TSU: 7800

2.4 Unit selection: Census District Selection. The list of 1996 Census Collection Districts (CDs) formed the area-based frame from which 488 CDs were selected. The frame of CDs was stratified by State, and within the five largest States in terms of population, by metropolitan and non-metropolitan regions. The CDs were sampled with probability proportional to their size as measured by the number of dwellings (unoccupied and occupied) recorded in the 1996 Census. To ensure the sample of CDs selected provided good coverage of the CDs in the frame, the CDs were sorted by statistical sub-division and section of State. Within each of these groups, the CDs were sorted into geographical (or serpentine) ordering based on the centroid of the CDs. Using a random start, a systematic selection of CDs was then undertaken by staff at the Melbourne Institute.

2.5 Final stage unit selection: Dwelling selection and Household selection.

- Dwelling selection: ACNielsen used a specifically trained team of interviewers to visit each selected CD and provide a full listing of the dwellings from which dwellings were selected for the [HILDA] Wave 1 sample. The interviewers followed

a predetermined route around the entire CD to list all dwellings they came across. Particular attention was paid to ensure that all dwellings had an equal probability of selection, including granny flats, flats, residential warehouses and battleaxe properties. The actual number of dwellings selected within each CD varied depending on projected variations across CDs in response rates and in occupancy rates. The response rate assumptions were based on ACNielsen's experience with survey response rates within the metropolitan and non-metropolitan areas of each State. The occupancy rates are based on the 1996 Census occupancy rates, with the additional qualification that no more than 10 additional selections could be added to cover the expected number of unoccupied dwellings. Given a targeted average of 16 responding households per CD, this meant the selected sample had to be large enough to generate 23 occupied in-scope dwellings per CD. The average number of selected dwellings was thus 25. The selection of dwellings from those listed occurred as follows: The initial dwelling was selected at random from the list of dwellings in the area. A skip of five in urban areas and two in rural areas was then applied to select the remainder of the dwellings required for the area. This ensured that the cluster of dwellings selected from each CD was sufficiently spread out across the CD while not generating large travel costs. For five of the more remote CDs selected that were extremely large in size, a block selection stage was used so that the entire CD did not have to be listed. For each of these areas, a satellite map which details the buildings in the CD was used to divide the CD into blocks with an approximately equal expected number of dwellings in each. A sample of these blocks was selected for full block listing.

- Household selection: Where a dwelling contained three or fewer households, all such households were sampled. Where there were four or more households occupying one dwelling, a random sample of three households was obtained. Where there were four or more households occupying one dwelling, all households had to be enumerated at the time of first contact and a random sample of three households obtained.

2.6 Within Household unit selection: All household members aged 15 and over interviewed.

2.7 Stratification: Explicit

AUSTRALIAN GGS WAVE 1

The sampling procedure above outlined, describes the method used to select the initial HILDA sample. However, the GGS Wave 1 did not come from the first wave of HILDA, but rather from Wave 5. The selection of the sample in Wave 5 would have been determined in large part from the initial sample selection used when HILDA first started. However, some people who participated in Wave 5 of HILDA (Wave 1 of GGS), would have been new people who entered after Wave 1 and who would not have been exposed to the same sample selection as the respondents who had participated since Wave 1.

Over time, the Wave 1 household members are followed but the sample is also extended to include:

- any children born to or adopted by members of the selected households; and
- new household members resulting from changes in the composition of the original households.
- a new household member that arrived in Australia for the first time after 2001 (since HILDA Wave 9).

Continuing Sample Members (CSMs) include all members of wave 1 households (including children). Any children born to or adopted by CSMs are also classified as CSMs. Further, all new entrants to a household who have a child with a CSM and any recent immigrants to Australia (arriving after 2001 for the Main Sample, 2011 for the Top-Up Sample) are converted to CSM status³⁵. CSMs remain in the sample indefinitely. All other people who share a household with a CSM in wave 2 or later are considered Temporary Sample Members (TSMs).

Where the household has moved, split or moved and split, the interviewers and office staff track the CSMs. The CSMs (along with their new household) are then interviewed, where applicable, at their new address or by phone.³⁶ TSMs that split from a household and are no longer part of a household with a CSM are not followed. However, if the TSM is converted to a CSM, then they are followed for interview as any CSM would be.

AUSTRALIAN GGS WAVE 2

The sample is represented by respondents who participated to HILDA Wave 5.

Response Rate

WAVE 1

Final disposition codes:

I = complete interview: 12,759 persons

P = partial interview: NA

NE = non-eligible : NA

NC = non-contact : NA

R = refusal: For 9,138 households, in 700 cases there was no contact. Of enumerated individuals, 72 could not be contacted

O = other non-response: For 9,138 households, in 1,313 cases refused. Of enumerated individual, 598 refused

UC = unknown eligibility, contacted: Of enumerated individuals, 142 had other reasons for non-response

UC = unknown eligibility, non-contact: NA
 eC = estimated proportion of contacted cases of unknown eligibility that are eligible: NA
 eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

WAVE 2

Final disposition codes for HILDA WAVE 8 (total no. of household interviewed 7066)

I = complete interview: 12,785 persons

P = partial interview: NA

NE = non-eligible : NA

NC = non-contact : NA

R = refusal: For 9,691 households, in 206 cases there was no contact.

O = other non-response: For 9,138 households, in 459 cases refused.

UC = unknown eligibility, contacted: 1970 household were not issued to field.

UC = unknown eligibility, non-contact: NA

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: NA

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

Specific Response rates for GGS Australia will be provided in forthcoming weeks.

Weighting

The datasets contain two versions of the cross-sectional person weight:

- The responding person population weight is the cross-section population weight for all people who responded in the relevant wave (i.e. they provided a personal interview).
- The responding person sample weight is the cross-section responding person population weight rescaled to sum to the number of responding persons in the relevant wave.

These cross-sectional weights opportunistically include temporary members into the sample (i.e., those people who are part of the sample only because they currently live with a continuing sample member). The underlying probability of selection for these households is amended to account for the various pathways into the household. Following this, non-response adjustments are made which require within-sample modelling of non-response probabilities and benchmarking to known population estimates.

Data Collection

Data Collection Dates	start 2005-08 end 2006-03 start 2008-08 end 2009-02
Data Collection Mode	<p>WAVE 1</p> <ul style="list-style-type: none"> • Method: Face-to-Face, Telephone and Self-administered were used. 93.5 per cent of respondents (N=11,932) were interviewed face-to-face, while 6.5 per cent (N=827) were interviewed by telephone. Respondents were also given a self-completion questionnaire to fill in. • Technique: Paper and Pencil (PAPI). <p>WAVE 2</p> <ul style="list-style-type: none"> • Method: Face-to-Face, Telephone and Self-administered were used. 10.1 per cent of the respondents were interviewed by telephone. Respondents were also given a self-completion questionnaire to fill in. • Technique: Paper and Pencil (PAPI). <p>The vast majority of the data were collected through face-to-face interviews. While telephone interviews and assisted interviews were conducted to ensure a high response rate, they are only used as a last resort. Due to the fact that some households moved outside of the areas originally selected across Australia in wave 1 and the desire to interview as many people as possible, more telephone interviews are necessary in later waves.</p>

Data Collection Notes

WAVE 1 DATA COLLECTION

1. Interviewers

- 1.1 Total number of interviewers: 132
- 1.2 Number of interviewers in the field: DK.
- 1.3 Network organization: DK.
- 1.4 Working arrangement of interviewers: DK.
- 1.5 Payment of interviewers: DK.

2. Interviewer training

- 2.1 General interviewing: Yes, with a briefing session covering the aims of the survey, fieldwork procedures, questionnaire content, and strategies to maximise response rates.
- 2.2 Survey specific: NA.
- 2.3 Length: The main briefing period took place over two days. Less experienced interviewers were also provided with an extra days training session focusing on refusal aversion.
- 2.4 Control of performance: Yes. Regular monitoring of each interviewer's response rate and progress against fieldwork schedule. Reallocation of workloads of under-performing interviewers to better interviewers, and scrutinisation of work returned by interviewers and provision of feedback especially in relation to the quality of the data collected. Supervisors re-contacted respondents to validate a minimum of 10 per cent of the questionnaires completed by each interviewer. The supervisors validated a selection of questions with the respondent as well as questioning any discrepancies identified in the provided information.
- 2.5 Interviewer survey: NA.

3. Contact protocols

- 3.1 Advance letter: A Primary Approach Letter and Newsletter were sent about one month prior the interviewer was supposed to contact the household. The newsletter informed about some results from prior waves of HILDA Survey. Households with new entrants to the survey, were given a New Entrants Brochure, which provided additional information about the study, why they had been asked to participate, and a method to opt out of the study.
- 3.2 Cold contacts: NA.
- 3.3 Scheduling / scattering: Yes, calls were made on a minimum of five different days, not all of which could be consecutive. A mix of daytime and evening times were used.
- 3.4 Contact history: Yes.
- 3.5 Min number of contacts: No.
- 2.6 Max number of contacts: Yes. The interviewer had up to six calls to make contact and a further six calls to undertake all of the interviews once contact had been made. If a household had to be put into tracking and was found, the initial call allocation to make contact with the household was carried over to the next period of the fieldwork. When following up a household, the interviewer had a total of five calls to finalise the household.

4. Questionnaire localization

- 4.1 Validation: NA.
- 4.2 Pre-test: A pilot was carried out in April 2005 (500 respondents).
- 4.3 Length of interview: The average length of the person interview was 31.7 minutes for a 'continuing sample member' who had also been interviewed at least once in previous HILDA surveys; 37.5 minutes for a 'new sample member'. There was an additional 30 minutes on average to complete a self-completion questionnaire, and 6 minutes for the household form.

WAVE 2 DATA COLLECTION

1. Interviewers

- 1.1 Total number of interviewers: 138
- 1.2 Number of interviewers in the field: DK.
- 1.3 Network organization: DK.
- 1.4 Working arrangement of interviewers: DK.
- 1.5 Payment of interviewers: DK.

2. Interviewer training

Same as Wave 1 (see above).

3. Contact protocols

Same as Wave 1 (see above).

4. Questionnaire localization

4.1 Validation: NA.

4.2 Pre-test: The questionnaires are developed over the 9-month period prior to the main fieldwork for each wave.

4.3 Length of interview: The average length of the person interview was 35.8 minutes.

There was an additional 30 minutes on average to complete a self-completion questionnaire, and 6 minutes for the household form.

Questionnaires

Structured questionnaire in English (though a professional interpreter may be present during the interview).

Data Collector(s)

Melbourne Institute of Applied Economic and Social Research (MIAESR)
The Nielsen Company (ACNielsen)

Supervision

WAVE 1 ACTIONS

1. Dealing with nonresponse

- Incentives: a cheque for \$25 to each person of the household who participated; plus a bonus \$25 in case everybody in the household took part.

2. Tracking of sampled units

2.1 Respondent contact information: Yes, contact details of the respondent were collected. These included work and mobile phone numbers, emails, and new address if the respondent was planning to move in the next 12 months, and knew his/her new address.

2.2 Other contact information: Yes. One to two contacts were obtained from the sample members of people who were most likely to know where they were if they moved. Work, home and mobile phone numbers, email addresses and postal addresses were collected for these contacts.

2.3 Cards: Yes a follow-up newsletter was sent.

2.4 Additional surveys: DK

2.5 Administrative records: No.

WAVE 2 ACTIONS

Same as Wave 1.

Data Processing & Appraisal

Data Editing

The keyed numerical data were subject to 100 per cent verification (i.e., the data was entered in twice and any discrepancies corrected). The keyed verbatim responses were only entered once as these were only used for coding purposes and any mis-entered data could be easily identified and corrected. During data entry, the data was checked using range, logical and consistency edits. Where necessary the data entry was suspended until the identified problem was resolved.

IMPROVEMENTS INTRODUCED WITH V.4.1. (April 2012):

- Variables corrected: aeduc amarstat anpartner ankids\$
- Variables with correct names now: aweight_*

IMPROVEMENTS INTRODUCED WITH V.4.0 (March 2012):

- New constructed variables: asex aage abyear aeduc aactstat aparstat amarstat anpartner ankids ahhszise ahhtype.
- New consolidated variables on respondents' current activity: a870, a871m, a871y, a874, a875.
- New consolidated variables on respondents' partners current activity: a940, a941m, a941y.
- Variables corrected: a601 and a602 (corrected, with consequences on the response rate of subsequent variables), a622, a623, a624, a625, a626, a627*, a628*, a629*, a631*, a383 (now rounded)

FIRST DATASET RELEASED: V. 3.0 (January 2012).**Processing Checks****DATA HARMONISATION**

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

# Cases	6143
# Variable(s)	538
File Structure	Type: relational Key(s): arid (R identification number)

File Content

GGG Wave 2

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.

The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.

Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.

Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.

A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia b119_2401. In order to have an overview of GGS country code, please refer to the variable "bcountry".

Version

Harmonized dataset, GGS Wave2, version 1.2.

IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.2 (April 2015)

The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.

- Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, brespartafterw1, blivingwithpartner, bchildprevp, bchildprevp, bfemage, bmaleage, bfemeduc, , bmaleeduc, bfertint, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl, bhhtype.

- Variables derived from month and year variable: b121AgeR, b150AgeR, bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Agb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP, b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.

- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour_x.
- Variables derived from frequency and unit variables: b203c_xw, b204c_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.
- Occupation variables recoded into ISCO-88 1 digit: b828_1dig, b832_1dig, b861_1dig, b917_1dig, b921_1dig, b933_1dig.
- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime_1801, bnumparttime_1802, bnumpartfulltime_1803, bnumfulltime_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876_xAgeR, bn877_xAgeR, bn878xAgeR, bn879_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

FIRST DATASET RELEASED: V. 1.1. (March 2014).

Processing Checks

DATA HARMONISATION

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

Variables List

Dataset contains 1378 variable(s)

File GGS_Wave1_Australia_V.4.2.							
#	Name	Label	Type	Format	Valid	Invalid	Question

Definition Q 001

Pre-question Interviewer Instruction: Write in the time and date when the interview starts.

Literal question Interview started at...on...

Interviewer's instructions Interviewer Instruction: Read the following text.
 This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

asex: Sex Respondent

Information [Type= discrete] [Format=numeric] [Range= 1-2147483625] [Missing=*/6]

Statistics [NW/ W] [Valid=7125 /-] [Invalid=0 /-]

Definition Consolidated variable.

Notes Copied from the Household grid (variable ahg4_1).

Value	Label	Cases	Percentage
1	male	3181	44.6%
2	female	3944	55.4%
6	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

ahhtype: Household type Respondent

Information [Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/96]

Statistics [NW/ W] [Valid=7125 /-] [Invalid=0 /-]

Definition Consolidated variable.

Notes Generated from household grid (variables ahg3_*). Respondents' households were classified into groups according to the criteria explicated below.

1 "living alone":
If the HH grid contains only R (hsize=1).

2 "single parent":
If HH grid contains R, at least one child (codes 2-6), and no parent.

3 "living with parents":
If HH grid contains R, at least one parent (codes 7, 8), and no child.

4 "single parent living with parents":
If HH grid contains R, at least one child and one parent, but no partner.

5 "couple with no children":
If HH grid contains R, his/her partner (code 1); no child, nor parent.

6 "couple with children"
If HH grid contains R, his/her partner, at least one child, and no parent.

7 "couple with parents"
If HH grid contains R, his/her partner, at least one parent, and no child.

8 "couple with parents and children"
If HH grid contains R, his/her partner, at least one parent and one child.

9 "other types"
HH types different from 1-8, that may include codes 9-17 on ahg3_* (e.g., Rs living with no relatives).

Value	Label	Cases	Percentage
1	living alone	2097	29.4%
2	single parent	593	8.3%
3	living with parents	337	4.7%
4	single parent living with parents	26	0.4%
5	couple with no children	1896	26.6%
6	couple with children	1938	27.2%
7	couple with parents	13	0.2%
8	couple with parents and children	11	0.2%
9	other types	214	3.0%
96	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

femage: If partnered: age of female

Information	[Type= discrete] [Format=numeric] [Range= 14-85] [Missing=*]
Statistics [NW/ W]	[Valid=2087 /-] [Invalid=5038 /-]
Definition	Derived variable
Universe	If R has a partner
Notes	This variable indicates the age of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents age is used (aage.) If the respondent is male and in a relationship with a female then their age is derived depending on the nature of the relationship. For a resident partner the age was copied from the Household grid (ahg5_); for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y). Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset.

File : GGS_Wave1_Australia_V.4.2.

numbiol: Total number of biological children

Information	[Type= discrete] [Format=numeric] [Range= 0-12] [Missing=*]
Statistics [NW/ W]	[Valid=7125 /-] [Invalid=0 /-]
Definition	Derived variable
Literal question	The number of biological children of the respondent (with the current or with former partner).
Notes	For resident children, copied from the Household grid (code 2 or 3 on variable ahg3); for non-resident children, copied from question a213 (code 1 on variable a213). Note that this variable refers to biological children of the respondent, coresident and non-resident, with the current partner or with an other partner.

Value	Label	Cases	Percentage
0		4639	65.1%
1		957	13.4%
2		992	13.9%
3		386	5.4%
4		110	1.5%
5		26	0.4%
6		10	0.1%
7		2	0.0%
8		2	0.0%
11		1	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

numres: Number of children in the household

Information	[Type= discrete] [Format=numeric] [Range= 0-6] [Missing=*]
Statistics [NW/ W]	[Valid=7125 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	Copied from the Household grid (code 2,3,4,5 or 6 on variable ahg3). Note that this variable refers to all children present in the household : biological, adopted and foster children of the respondent and step children whatever their age.

Value	Label	Cases	Percentage
0		4557	64.0%
1		947	13.3%
2		1030	14.5%
3		414	5.8%
4		127	1.8%
5		33	0.5%
6		12	0.2%

File : GGS_Wave1_Australia_V.4.2.

numres: Number of children in the household

numrespleave: Number of children for whom respondent has been on pat/maternity leave

Information	[Type= discrete] [Format=numeric] [Range= 0-6] [Missing=*]
Statistics [NW/ W]	[Valid=7125 /-] [Invalid=0 /-]
Definition	Derived variable
Literal question	- Now, please think of your children who currently live in your household. With whom have you been on parental leave or childcare leave? - Were you on parental leave or childcare leave for [name]
Notes	For resident children, copied from answer to question 206 (a206); for non-resident children, copied from answer to question 218 (a218). Note that this variable refers to children younger than 14 only. Data not available for Hungary, Italy, Norway, Estonia, Poland, Netherlands

Value	Label	Cases	Percentage
0		7095	99.6%
1		22	0.3%
2		6	0.1%
3		2	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

numotherparentleave: Number of children for whom other parent has been on pat/maternity leave

Information	[Type= discrete] [Format=numeric] [Range= 0-4] [Missing=*]
Statistics [NW/ W]	[Valid=7125 /-] [Invalid=0 /-]
Definition	Derived variable
Literal question	- And in connection with which children has the child's father (mother) been on parental leave or childcare leave? - Was [name's] father/mother on parental leave or childcare leave with [name]?
Notes	For resident children, copied from answer to question 207 (a207); for non-resident children, copied from answer to question 219 (a219). Note that this variable refers to children younger than 14 only. Data not available for Hungary, Italy, Norway, Estonia, Poland, Netherlands

Value	Label	Cases	Percentage
0		7125	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

coreschild: Respondent has coresident child

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=7125 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent's or Respondent's partner's child is present in the Household grid (codes 2 through 6, and country specific values 2402 and 1702); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	2568	36.0%

File : GGS_Wave1_Australia_V.4.2.

coreschild: Respondent has coresident child

Value	Label	Cases	Percentage
2	No	4557	64.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

coresparen: Respondent has coresident parent

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=7125 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent's or Respondent's partner's parent is present in the Household grid (codes 7 through 10); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	415	5.8%
2	No	6710	94.2%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

coresgrandp: Respondent has coresident grandparent or great-grandparent

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=7125 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent's or Respondent's partner's grandparent or great-grandparent is present in the Household grid (code 12); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	15	0.2%
2	No	7110	99.8%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

coressibl: Respondent has coresident sibling

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=7125 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent's or Respondent's partner's sibling is present in the Household (codes 13, 14); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	267	3.7%
2	No	6858	96.3%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

livingwithpartner: Partner living in household of respondent

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=7125 /-] [Invalid=0 /-]

a107AgeR: R's age of starting to live in country of interview

Information	[Type= discrete] [Format=numeric] [Range= 0-63] [Missing=*997/998/999]
Statistics [NW/ W]	[Valid=1563 /-] [Invalid=5562 /-] [Mean=21.406 /-] [StdDev=13.35 /-]
Definition	Derived variable from Q 107 core questionnaire
Universe	If code 2 on Q 105
Literal question	In what month and year did you first start living permanently in [country]?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the country of interview was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December" Data is not available for Estonia.

a121AgeR: R's age of starting to live in current dwelling

Information [Type= discrete] [Format=numeric] [Range= 0-78] [Missing=*997/998/999]

Statistics [NW/ W] [Valid=7053 /-] [Invalid=72 /-] [Mean=37.203 /-] [StdDev=15.328 /-]

Definition Derived variable from Q 115 core questionnaire

Literal question In what month and year did you start living in this [type of accommodation]?

Notes R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the current dwelling was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Data is not available for Estonia.

# a302bTdiff: Time elapsed between start of living together and marriage (years)	
Information	[Type= discrete] [Format=numeric] [Range= -40-52] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=2993 /-] [Invalid=4132 /-] [Mean=1.161 /-] [StdDev=2.287 /-]
Definition	Derived variable from Q 302.b core questionnaire
Universe	If code 1 on question 302.a
Literal question	In what month and year did you marry?
Notes	The time of starting to live together was deducted from the answer to Q 301. If information on the month at start living together / month of marriage was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". If respondents got married before living together then the observation is excluded.

a310: Have relationship to somebody without cohabitation

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]
Statistics [NW/ W]	[Valid=3195 /-] [Invalid=3930 /-]
Definition	Q 306 core questionnaire
Universe	If R does NOT have a co-resident partner
Literal question	Are you currently having an intimate (couple) relationship with someone you're not living with? This may also be your spouse if he/she does not live together with you. Our survey does not only cover heterosexual relationships, but also same-sex relationships. If you have a partner of the same sex, please answer the following questions as well.

Value	Label	Cases	Percentage
1	yes	710	22.2%
2	no	2485	77.8%
7	does not know	0	
8	refusal	6	
9	no response/not applicable	66

Statistics [NW/ W]	[Valid=4399 /-] [Invalid=2726 /-] [Mean=27.762 /-] [StdDev=9.541 /-]		
Definition	Consolidated variable from variables a301AgeR and a311AgeR (derived variables from Q 301 and Q 307 core questionnaire). POL: only co-resident partner		
Universe	If R has a partner (co-resident or non-resident)		

a371AgeR: R's age at start of current relationship (consolidated)

Literal question	In what month and year did you and he/she first start living together? (if co-resident partner) In what month and year did this relationship start? (if non-resident partner)
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when started living with current partner was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a871AgeR: R's age at start of current activity status

Information [Type= discrete] [Format=numeric] [Range= 0-73] [Missing=*/997/998/999]

Statistics [NW/ W] [Valid=4526 /-] [Invalid=2599 /-] [Mean=33.269 /-] [StdDev=11.457 /-]

Definition Generated from consolidated variables a871m and a871y.

Literal question
 In what month and year did you start this leave?
 In what month and year did you become unemployed?
 Since what month and year are you a student, studying at school, or in vocational training?
 In what month and year did you retire?
 Since what month and year are you a homemaker?
 In what month and year did you start this job or business?

Notes
 R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way:
 "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

This variable is not available for Belgium.

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

a921: Partner's current occupation (see code ISCO)

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/9997/9998/9999]
Statistics [NW/ W]	[Valid=2358 /-] [Invalid=4767 /-]
Definition	Q 921 core questionnaire DEU: only country specific values "1401-farmer", "1402-highly skilled profession (medicin, lawyer etc.)", "1403-self-employed", "1404-civil servant, judge, officer", "1405-clerk", "1406-worker", "1407-still in training", "1408-paid family worker".
Universe	If code 1 or 2 on Q 901 OR code 1 on Q 920
Pre-question	I would now like to ask a few questions about your partner's/spouse's current job or business. If he/she is engaged in two or more jobs or businesses, I would like you to tell me now only about the one in which he/she spends most of his/her working hours.
Literal question	What is your partner's/spouse's current occupation? Please describe the principal activity he/she performs.
Notes	ISCO '88 code must be regarded

Information	[Type= discrete] [Format=numeric] [Range= 0-72] [Missing=*997/998/999]		
Statistics [NW/ W]	[Valid=55 /-] [Invalid=7070 /-] [Mean=38.345 /-] [StdDev=10.951 /-]		
Definition	Generated from consolidated variables a941m and a941y.		
Universe	If R has a partner.		
Literal question	<p>In what month and year did your partner/spouse start this leave?</p> <p>In what month and year did he/she become unemployed?</p> <p>Since what month and year is your partner/spouse a student, in school, or in vocational training?</p> <p>In what month and year did your partner/spouse retire?</p> <p>Since what month and year is your partner/spouse a homemaker?</p>		
Notes	<p>Partner's time of birth was deducted from HH grid (co-resident partner) or Q 311 (non resident partner). If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". In Belgium if the partner is still in education (a941y==2301) then the variable was coded as system missing.</p>

Interviewer's instructions Interviewer Instruction: Read the following text.

File : GGS_Wave2_Australia_V1.2.

bmonth: Mnth of interview

This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.

The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.

Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.

We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.

bnumpartnerships: Number of co-resident partners Respondent ever had (including current if one)

Information	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=* /96]
Statistics [NW/ W]	[Valid=5984 /-] [Invalid=159 /-]
Definition	Derived variable
Notes	The total number of partnership dissolutions reported at wave 1 (variable numdissol at wave 1) PLUS the partnership dissolutions between the two waves (variable bnumdissol) PLUS the current partnership if one exists (partner is present in the Household grid at wave 2). Note that this variable only refers to resident partners, past and present.

Value	Label	Cases	Percentage
0		1534	25.6%
1		3619	60.5%
2		735	12.3%
3		87	1.5%
4		8	0.1%

bhhtype: Household type Respondent

Information	[Type= discrete] [Format=numeric] [Range= 1-96] [Missing=* /97/98/99]
Statistics [NW/ W]	[Valid=6143 /-] [Invalid=0 /-]
Definition	Consolidated variable.
Notes	Generated from household grid (variables bhg3_*). Respondents' households were classified into groups according to the criteria explicated below. 1 "living alone":

File : GGS_Wave2_Australia_V1.2.

bhhtype: Household type Respondent

If the HH grid contains only R (hhsz=1).
 2 "single parent":
 If HH grid contains R, at least one child (codes 2-6), and no parent.
 3 "living with parents":
 If HH grid contains R, at least one parent (codes 7, 8), and no child.
 4 "single parent living with parents":
 If HH grid contains R, at least one child and one parent, but no partner.
 5 "couple with no children":
 If HH grid contains R, his/her partner (code 1); no child, nor parent.
 6 "couple with children"
 If HH grid contains R, his/her partner, at least one child, and no parent.
 7 "couple with parents"
 If HH grid contains R, his/her partner, at least one parent, and no child.
 8 "couple with parents and children"
 If HH grid contains R, his/her partner, at least one parent and one child.
 9 "other types"
 HH types different from 1-8, that may include codes 9-17 on bhg3_* (e.g., Rs living with no relatives).

Value	Label	Cases	Percentage

bnnumboth: The number of R's working statuses that have changed from part-time to full-time since age 16

Information	[Type= discrete] [Format=numeric] [Range= 0-4] [Missing=* /997/998/999]
Statistics [NW/ W]	[Valid=6143 /-] [Invalid=0 /-]
Definition	Derived variable from Q 805 (variables bn875_*).
Literal question	Was it full time or part time?
Notes	The number of R's working statuses that have changed from part-time to full-time (or the other way around) since age 16 (code 3 on Q 805, variables bn875_*).

Value	Label	Cases	Percentage
0		6143	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bndurstudentstatus: Total duration (in month) of Rs working statuses as student, in school, in vocational training since age 16

Information	[Type= discrete] [Format=numeric] [Range= 0-768] [Missing=* /997/998/999]
Statistics [NW/ W]	[Valid=6143 /-] [Invalid=0 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as student, in school, in vocational training since age 16 (code 1 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Value	Label	Cases	Percentage
0		6143	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bnduremplstatus: Total duration (in month) of Rs working statuses as employed since age 16

Information	[Type= discrete] [Format=numeric] [Range= 0-799] [Missing=* /997/998/999]
Statistics [NW/ W]	[Valid=6143 /-] [Invalid=0 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as employed since age 16 (code 2 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation.

File : GGS_Wave2_Australia_V1.2.

bnduremplstatures: Total duration (in month) of Rs working statuses as employed since age 16

Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Value	Label	Cases	Percentage
0		6143	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bndurselfemplstatures: Total duration (in month) of Rs working statuses as self employed since age 16

Information [Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999]

Statistics [NW/ W] [Valid=6143 /-] [Invalid=0 /-]

Definition Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).

Literal question
When did this period of [activity] start?
When did this period of [activity] end?

Notes Total duration (in month) of Rs working statuses as self employed since age 16 (code 3 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Value	Label	Cases	Percentage
0		6143	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bndurhelpfamstatures: Total duration (in month) of Rs working statuses as helping family member in a family business or farm since age 16

Information [Type= discrete] [Format=numeric] [Range= 0-677] [Missing=*/997/998/999]

Statistics [NW/ W] [Valid=6143 /-] [Invalid=0 /-]

Definition Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).

Literal question
When did this period of [activity] start?
When did this period of [activity] end?

Notes Total duration (in month) of Rs working statuses as helping family member in a family business or farm since age 16 (code 4 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Value	Label	Cases	Percentage
0		6143	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bndurunemplstatures: Total duration (in month) of Rs working statuses as unemployed since age 16

Information [Type= discrete] [Format=numeric] [Range= 0-720] [Missing=*/997/998/999]

Statistics [NW/ W] [Valid=6143 /-] [Invalid=0 /-]

Definition Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).

Literal question
When did this period of [activity] start?
When did this period of [activity] end?

Notes Total duration (in month) of Rs working statuses as unemployed since age 16 (code 5 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

File : GGS_Wave2_Australia_V1.2.

bndurunemplstatus: Total duration (in month) of Rs working statuses as unemployed since age 16

Value	Label	Cases	Percentage
0		6143	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bndurretiredstatus: Total duration (in month) of Rs working statuses as retired since age 16

Information	[Type= discrete] [Format=numeric] [Range= 0-660] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=6143 /-] [Invalid=0 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as retired since age 16 (code 6 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Value	Label	Cases	Percentage
0		6143	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bndurmilitarystatus: Total duration (in month) of Rs working statuses as in military or social service since age 16

Information	[Type= discrete] [Format=numeric] [Range= 0-487] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=6143 /-] [Invalid=0 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as in military or social service since age 16 (code 7 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Value	Label	Cases	Percentage
0		6143	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bndurhomestatus: Total duration (in month) of Rs working statuses as homemaker since age 16

Information	[Type= discrete] [Format=numeric] [Range= 0-780] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=6143 /-] [Invalid=0 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as homemaker since age 16 (code 8 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Value	Label	Cases	Percentage
0		6143	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

Universe	If R has a non-resident partner (code 1 on Q 325).
Literal question	In what month and year did this relationship start?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when started current relationship was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Information	[Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*7/8/9]
Statistics [NW/ W]	[Valid=1049 /-] [Invalid=5094 /-]
Definition	Consolidated variable Q 1004 and Q 1020 (variables b904 and b920).
Universe	If R has a partner
Literal question	Did your partner/spouse do any paid work in the 7 days ending last Sunday, either as an employee or self-employed?
Notes	Generated using the following variables: - b904 (Q 1004) if b901=9 or 10; - b920 (Q 1020) if b901= 1,5,6,7,8,11,12.

Value	Label	Cases	Percentage
1	yes	24	2.3%
2	no	1025	97.7%
7	does not know	0	
8	refusal	0	
9	no response/not applicable	5094	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

# b1002: HH able to make ends meet	
Information	[Type= discrete] [Format=numeric] [Range= 1-2406] [Missing=*7/8/9]
Statistics [NW/ W]	[Valid=5355 /-] [Invalid=788 /-]
Definition	Q 1102
Literal question	A household may have different sources of income and more than one household member may contribute to it. Thinking of your household's total monthly income, is your household able to make ends meet ...

Value	Label	Cases	Percentage
1	with great difficulty	45	0.8%
2	with difficulty	186	3.5%
3	with some difficulty	1606	30.0%
4	fairly easily	2781	51.9%

b1002: HH able to make ends meet

Value	Label	Cases	Percentage
5	easily	661	12.3%
