## Generations and Gender Survey Czech Republic Wave 1 & Wave 2 (Czech Republic Wave 1 & Wave 2)

### Overview

<b>Identification</b>	GGSW1.28
-----------------------	----------

#### Abstract

The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.

In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion".

The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:

- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.
- A broad age range. It includes respondents between the ages of 18 and 80.
- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.
- A large sample size. It has an average of 9,000 respondents per country at Wave 1.
- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.
- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.

<b>Kind of Data</b>	Survey data
---------------------	-------------

<b>Unit of Analysis</b>	Individuals
-------------------------	-------------

### Scope & Coverage

<b>Keywords</b>	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender Relations, Intergenerational exchange, Informal and formal care, Well being and health, Grandparenthood, Economic activity, Retirement
-----------------	---

<b>Time Period(s)</b>	2005-2009
-----------------------	-----------

<b>Countries</b>	Czech Republic
------------------	----------------

#### Geographic Coverage

Whole territory of Czech Republic.

#### Universe

##### WAVE 1

Complete interviews: 10 006; 80% of respondents subscribed with repeat survey.

##### WAVE 2

Complete interviews: 10 071 (of whom 3195 had been interviewed at Wave 1); 72 % of all Wave-2-respondents subscribed with repeat survey.

<b>Other Producer(s)</b>	Department of Demography and Geodemography, Charles University in Prague , coordination Research Institute for Labour and Social Affairs
<b>Other Acknowledgment(s)</b>	Czech Statistical Office SC&C Ltd. – Survey, Consulting & Care , data collection, panel maintenance

<b>Sampling</b>
<p><b><u>Sampling Procedure</u></b>  <b>WAVE 1 SAMPLING PROCEDURE</b>            Sampling: probability.</p> <p><b>WAVE 2 SAMPLING PROCEDURE</b>            Database from Wave 1 + quota sampling.</p>
<p><b><u>Response Rate</u></b>  <b>WAVE 1</b>            There were 10 006 completed interviews.            - Complete interview: 42%            - Refusal: 36%            - Not eligible: 14% (empty flats/not found, uncollectible households, unsuited quota)            - Non-contact: 7%            The response rate by region varied from a minimum of 35% to a maximum of 55%.</p> <p><b>WAVE 2</b>            There were 10 071 completed interviews, of whom 3195 had been interviewed at Wave 1.            A) The response rates below concern panel interviews (interviews for which agreement with participation in a panel was obtained).            - Complete interview: 47%            - Refusal: 38%            - Not eligible: 14% (empty flats/not found, not alive, has moved)            Among the same group of respondents, the response rate by region varied from a minimum of 26% to a maximum of 61%.            B) The response rates are calculated with reference to Wave 1 total sample.            - Complete interview: 32%            - Refusal: 51%            - Not eligible: 17% (empty flats/not found, not alive, has moved)</p>
<p><b><u>Weighting</u></b>            A standardised weight variable is available for in Wave 2 dataset.</p>

<b>Data Collection</b>	
<b>Data Collection Dates</b>	Wave 1: start 2005-02-04 Wave 1: end 2005-09-21 Wave 2: start 2008-01-31 Wave 2: end 2009-03
<b>Data Collection Mode</b>	WAVE 1 Method: Face-to-Face (personal interview) Technique: Paper and pencil (PAPI)  WAVE 2

Method: Face-to-Face (personal interview) Technique: Computer-assisted personal interviewing (CAPI) + Computer-Assisted Self Interviewing (CASI)	
<b>Data Collection Notes</b>	
WAVE 1 DATA COLLECTION	
1. Questionnaire localization	
- Pilot survey was conducted from 29/11.-20/12.2004, on 394 persons.	
- Length of interview: in mean interviews lasted 77 min; 24% of interviews lasted for 90+ min.; 32 % lasted less than 60 min.	
2. Contact protocols	
- Advance letter: information letter sent in advance to respondents	
- Cold contacts: Face-to-Face	
- Scheduling / scattering: Personal interviewer's visit - stating a date of an interview	
- Min number of contacts: 4. only after the 4th unsuccessful visit an interviewer was to find a substitute (identical in basic characteristics=sex, age, education, size of domicile)	
WAVE 2 DATA COLLECTION	
1. Questionnaire localization	
- Length of interview: in mean interviews lasted 77 min; 23% of interviews lasted for 90+ min.; 25 % lasted less than 60 min.	
2. Contact protocols	
- Advance letter: information letter sent in advance to respondents	
- Cold contacts: Face-to-Face	
- Scheduling / scattering: Personal interviewer's visit - stating a date of an interview	
- Min number of contacts: 4; only after the 4th unsuccessful visit an interviewer was to find a substitute (identical in basic characteristics=sex, age, education, size of domicile)	
<b>Questionnaires</b>	
Structured questionnaire in Czech.	
<b>Data Collector(s)</b>	SC&C Ltd. – Survey, Consulting & Care
<b>Supervision</b>	
WAVE 1 AND WAVE 2 ACTIONS	
- Tracking of sampled units	
In order to keep contact with respondents they received a special leaflet with an acknowledgement for their participation and with the main results from the survey. Additionally a thank you letter was sent together with information about basic results; a reminder was also sent at the New Year time; there were also telephone contacts with the CS&C agency. However there were limited financial resources and the fact of trying to keep in contact with respondents was somewhat depreciated due a general unfavourable attitudes towards surveys in the country.

# Files Description

Dataset contains 2 file(s)

<b>GGG_Wave1_CzechRepublic_V.4.2.</b>	
<b># Cases</b>	10006
<b># Variable(s)</b>	1493
<b>File Structure</b>	Type: relational Key(s): arid (R identification number)
<p><b><u>File Content</u></b> GGG Wave 1</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><b><u>Version</u></b> Harmonized dataset, GGS Wave1, version 4.2.</p>	
<p><b><u>Processing Checks</u></b> DATA HARMONISATION</p> <p>The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:</p> <ol style="list-style-type: none"> <li>1. Label checks This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.</li> <li>2. Dealing with grids The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).</li> </ol>	

### 3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

### 4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

### 5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

### 6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

## **GGG\_Wave2\_CzechRepublic\_V1.2.**

<b># Cases</b>	3151
<b># Variable(s)</b>	1361
<b>File Structure</b>	Type: relational Key(s): arid (R identification number)

### **File Content**

GGG WAVE 2

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR.

This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.

The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.

Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.

Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.

A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119\_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".

### **Version**

Harmonized dataset, GGS Wave2, version 1.2.

### **IMPROVEMENTS INTRODUCED WITH GGS\_Wave2\_V.1.2 (April 2015)**

The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.

- Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrespartafterw1, blivingwithpartner, bchildprevp, bchildprevp, bfemage, bmaleage, bfemeduc, , bmaleeduc, bfertintent, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl, bhhtype.
- Variables derived from month and year variable: b121AgeR, b150AgeR, bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Agb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP, b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.
- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour\_x.
- Variables derived from frequency and unit variables: b203c\_xw, b204c\_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.
- Occupation variables recoded into ISCO-88 1 digit: b828\_1dig, b832\_1dig, b861\_1dig, b917\_1dig, b921\_1dig, b933\_1dig.
- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime\_1801, bnumparttime\_1802, bnumpartfulltime\_1803, bnumfulltime\_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876\_xAgeR, bn877\_xAgeR, bn878xAgeR, bn879\_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

### **IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):**

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

FIRST DATASET RELEASED: V. 1.1. (July 2014).

### **Processing Checks**

#### **DATA HARMONISATION**

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

### 1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

### 2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("\_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3\_# or bhg3\_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

### 3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

### 4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

### 5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

### **Notes**

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.

#### WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

#### WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

# Variables List

**Definition** Q 001

**Pre-question** Interviewer Instruction: Write in the time and date when the interview starts.

**Literal question** Interview started at...on...

**Interviewer's instructions** Interviewer Instruction: Read the following text.  
This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # ayear: Yr of interview

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 997-2147483624] [Missing=*/9997/9998/9999]
<b>Statistics [NW/ W]</b>	[Valid=10006 /-] [Invalid=0 /-]
<b>Definition</b>	Q 001
<b>Pre-question</b>	Interviewer Instruction: Write in the time and date when the interview starts.
<b>Literal question</b>	Interview started at...on...
<b>Interviewer's instructions</b>	Interviewer Instruction: Read the following text. This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

Value	Label	Cases	Percentage
2004		5	0.0%
2005		10000	99.9%
2006		1	0.0%
9997	does not know	0	
9998	refusal	0	
9999	not applicable/no response	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # aage: Age Respondent

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 18-2147483625] [Missing=*/996]
<b>Statistics [NW/ W]</b>	[Valid=10006 /-] [Invalid=0 /-] [Mean=44.758 /-] [StdDev=17.247 /-]
<b>Definition</b>	Consolidated variable.
<b>Notes</b>	Generated using household grid variables (ahg6m_1, ahg6y_1,ahg5_1) and amonth, ayear. If information on the month at birth / month of interview was missing, a 6 (june) was used in the calculation.

7		1	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # childprevp: any children from previous partnership

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=10006 /-] [Invalid=0 /-]
<b>Definition</b>	Derived variable
<b>Notes</b>	"Yes" if Respondent had children with any previous partner (question 332 (a345), "Partnership history" grid); "No" otherwise.  Data not available for Australia, Hungary, Estonia or Italy.

Value	Label	Cases	Percentage
1	Yes	0	
2	No	10006	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # femage: If partnered: age of female

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 14-85] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=3233 /-] [Invalid=6773 /-]
<b>Definition</b>	Derived variable
<b>Universe</b>	If R has a partner
<b>Notes</b>	This variable indicates the age of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents age is used (aage.)  If the respondent is male and in a relationship with a female then their age is derived depending on the nature of the relationship. For a resident partner the age was copied from the Household grid (ahg5_); for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y). Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset. Note that this variable does not have a value for same-sex partnerships.

**# a150AgeR: R's age of achieving the current education level**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-69] [Missing=*997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=9371 /-] [Invalid=635 /-] [Mean=18.794 /-] [StdDev=4.548 /-]
<b>Definition</b>	Derived variable from Q 122 core questionnaire
<b>Literal question</b>	In what month and year did you reach that level?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".  Data is not available for Norway.

<b>Statistics [NW/ W]</b>	[Valid=5504 /-] [Invalid=4502 /-] [Mean=47.214 /-] [StdDev=14.887 /-]
<b>Definition</b>	Derived variable from Q 311 core questionnaire
<b>Universe</b>	If R has a non-resident partner (code 1 on Q 306)
<b>Literal question</b>	In what month and year was your partner/spouse born?
<b>Notes</b>	If information on partner's month of birth was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

### # a332: Intention to marry during next 3 yrs

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]
<b>Statistics [NW/ W]</b>	[Valid=731 /-] [Invalid=9275 /-]
<b>Definition</b>	Q 324 core questionnaire NOR: only country specific values "2001-no", "2002-yes". HUN: one additional value "1601-not".

**# a332: Intention to marry during next 3 yrs**

BEL: filter is different. Due to filter misspecification during data collection this question has only been asked to respondents who are not currently married and have a NON-resident partner.

EST: filter is different. This question has only been asked to respondents who have a co-resident partner to whom they are not married.

POL: error in data collection, only respondents with a co-resident partner to whom they are not married are asked about marital intentions (no lat partnerships!).

**Universe** If R is currently NOT married

**Literal question** Do you intend to marry somebody/ your partner during the next 3 years?

Value	Label	Cases	Percentage

**# a710: Any regular help given over last 12 mnths**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]
<b>Statistics [NW/ W]</b>	[Valid=9736 /-] [Invalid=270 /-]
<b>Definition</b>	Q 710 core questionnaire
<b>Literal question</b>	Over the last 12 months, have you given people regular help with personal care such as eating, getting up, dressing, bathing, or using toilets? Do not include the care you may have given to small children.
<b>Post-question</b>	If it is R's job to help people with personal care, consider only the help outside his/her job.

Value	Label	Cases	Percentage
1	yes	547	5.6%
2	no	9189	94.4%
7	does not know	0	
8	refusal	0
