Generations and Gender Survey Germany Wave 1 & Wave 2 (GGS Germany Wave 1 & Wave 2)

Generationenbeziehungen und Rollenverteilungen

Overview	
Identification	GGS.W1.W2.14
<p>Abstract</p> <p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion".</p> <p>The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> - Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets. - A broad age range. It includes respondents between the ages of 18 and 80. - A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals. - A large sample size. It has an average of 9,000 respondents per country at Wave 1. - A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior. - Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts. 	
Kind of Data	Survey data
Unit of Analysis	Individuals

Scope & Coverage	
Keywords	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
Time Period(s)	2005-2009
Countries	Germany
<p>Geographic Coverage</p> <p>Whole Germany.</p>	
<p>Universe</p> <p>WAVE 1</p> <p>German speaking persons aged 18 to 79 living in private household in Germany.</p> <p>WAVE 2</p> <p>Persons who took part to Wave 1 and who declared to be willing to be re-contacted for Wave 2.</p>

Sampling

Sampling Procedure

WAVE 1 SAMPLING PROCEDURE

1. Sampling frame

1.1 Type of frame: So-called ADM-Master sample (as at December 2002), which divides Germany on the basis of GIS in 53,000 sample-points.

1.2 Frame coverage:

1.3 Frame size:

1.4 Level of units available:

2. Sampling method

2.1 Sampling method type: Random route survey according to the ADM design: 1) all municipalities of the survey territory are divided into layers by regional criteria (Laender, administrative districts, municipality types (population size)) - those sample points are sub-divided proportionately to the number of households in the layers (cells); with the aid of a geographical information system (GIS) streets are roughly sub-divided into 53,000 areas; The sample points defined by these means are exclusively at the disposal of the ADM member institutes in the form of the so-called ADM sample networks; total of 1,475 sample points were selected in this first step; 2) household addresses needed for the sample were collected by random selection; interviewers deployed are set a starting address which can be defined per sample point and using a precisely-defined route; 3) the interviewers were obliged to contact one target household and to carry out an interview if a respondent from the defined population had his/her first place of residence there; if several persons lived in the household belonging to the population, the interviewer identified the respondents who were to be asked on a strictly random basis aid of a systematic selection key (Kish selection grid).

2.2 Sampling stage definition

- PSU: Sample points.

- SSU: Addresses per point.

- TSU: NA

2.3 Sampling stage size

- PSU: 1,475 sample-points.

- SSU: 14 addresses per point (=gross estimate 20,650).

- TSU: NA

2.4 Unit selection: NA

2.5 Final stage unit selection: NA

2.6 Within Household unit selection: The interviewers were obliged to contact one target household and to carry out an interview if a respondent from the defined population had his/her first place of residence there; if several persons lived in the household belonging to the population, the interviewer identified the respondents who were to be asked on a strictly random basis aid of a systematic selection key (Kish selection grid).

2.7 Stratification: NA

2.8 Sample size: NA

- Starting size sample: 18,123.

- Aimed total size at Wave 1: 10,017.

- Aimed total size at Wave 3:

2.9 Estimated Non-response

- Initial non-response: 8,079.

- Yearly attrition: Wave 1 to wave 2 around 2/3 (67%).

- Non response measures: None.

- Within household non-responses measures: NA

WAVE 2 SAMPLING PROCEDURE: same population than Wave 1 who had agreed to be re-contacted, i.e. n=6,409 respondents.

Response Rate

WAVE 1

Response rate - Final disposition codes:

I = complete interview: 10,017

P = partial interview: NA

NE = non-eligible : 2,527 (1,320 "No person in the target group", 1,207 "other sample-neutral failures") + 27 (Carried out interviews)

NC = non-contact : 1,948

R = refusal: 5,134

O = other non-response: 997

UC = unknown eligibility, contacted: NA

UC = unknown eligibility, non-contact: NA

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: NA

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

WAVE 2

Response rate - Final disposition codes:

I = complete interview: 3,285 (of which 58 interviews had to be removed due to wrong respondent surveyed. Hence, the number of complete interviews is: 3227)

P = partial interview: NA

NE = non-eligible: 72

NC = non-contact: 716

R = refusal: 1,091 (unwillingness to participate) + 457 (lack of time)=1548

O = other non-response: 201 (respondents ill) + 17 (language problems) + 212 (other non-response)=430

UC = unknown eligibility, contacted: NA

UC = unknown eligibility, non-contact: NA

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: NA

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

Weighting

WAVE 1 WEIGHTING

Yes, two weighting variables, household and personal weight. Procedure: 1) household sample was weighted, both by Federal Länder and municipality size classes (BIK) and by household size. This level corrects deviations from the original sample approach proportionate to the household; 2) overall sample was now adjusted to the target structures of the characteristics Federal Land, age groups, sex and education known from the official statistics (Mikrozensus 2003); 3) In a final weighting level, the additional qualitative improvements achieved by the person weighting in the sample were projected back to the household sample, so that evaluations of household characteristics now also show the same degree of representation as person-weighted ones.

WAVE 2 WEIGHTING

The sample that had been achieved in the second wave was adjusted to the same target structures than Wave 1. The information provided by those who were resurveyed on Federal Länder, age groups, sex and education from the first survey wave were used as a basis for this weighting. The official data basis for the characteristics Federal Länder, age groups and sex was formed by the population extrapolation of the Federal Statistical Office (2003). The information from the Microcensus 2003 was also once more used as a set of reference statistics for the margin weighting according to East/West, age groups and education.

Data Collection

Data Collection Dates	Wave 1: start 2005-02-22 Wave 1: end 2005-05-12 Wave 2: start 2008-09-15
------------------------------	--

	Wave 2: end 2009-03-30
Data Collection Mode	Method: Face-to-Face (personal interview) Technique: Computer-Assisted (CAPI)
Data Collection Notes	
WAVE 1 DATA COLLECTION	
1. Interviewers	
1.1 Total number of interviewers: 528.	
1.2 Number of interviewers in the field: NA	
1.3 Network organization: Centralized network with 6 regions being coordinated from TNS infratest. Local field coordinators were responsible for the fieldwork conducted within the region.	
1.4 Working arrangement of interviewers: Part time.	
1.5 Payment of interviewers: Paid per interview (successful contact).	
2. Interviewer training:	
2.1 General interviewing: Not for this project but in general with training materials distributed by central network and training conducted locally by field coordinators.	
2.2 Survey specific: Yes, by sending written interviewer instruction before fieldwork started.	
2.3 Length: 1 hour.	
2.4 Control of performance: For randomly selected 10% of the interviews postcards with some questions about fieldwork (e.g. length of interview) were sent to the respondent. In case of questionable interviews the whole work (100%) of the interviewer was controlled.	
2.5 Interviewer survey: No.	
3. Contact protocols	
3.1 Advance letter: No.	
3.2 Cold contacts: Face-to-face.	
3.3 Scheduling / scattering: Yes, interviewers were entitled to scatter contact attempts by making sure that more than 50% of contact attempts were in the afternoon of week-days or on week-ends.	
3.4 Contact history: No.	
3.5 Min number of contacts: 4.	
3.6 Max number of contacts: No.	
4. Questionnaire localization	
4.1 Validation: No.	
4.2 Pre-test: One pre-test carried out using CAPI version of the questionnaire in winter 2004/05 (115 respondents). Country-specific response categories were used for questions on e.g., education and occupation. 6 additional country-specific questions were added as compared to the harmonised questionnaire. These questions concern family policy measures, fertility intentions and abortion.	
4.3 Length of interview: Average length of interview: 57 minutes, with wide range (minimum 27 minutes, maximum 164 minutes) according to the composition of the household and the biography of the respondent.	
WAVE 2 DATA COLLECTION	
1. Interviewers	
1.1 Total number of interviewers: 404.	
1.2 Number of interviewers in the field: DK	
1.3 Network organization: Centralized network coordinated from TNS infratest.	
1.4 Working arrangement of interviewers: Interviewer deployment followed the principle that the same interviewers were deployed again for the follow-up questionnaire wherever this was possible and meaningful. All in all, the same interviewer as in 2005 was only deployed with somewhat more than half the respondents.	
2. Interviewer training: DK	
3. Contact protocols	
3.1 Advance letter: Yes - shortly before starting the fieldwork in 2008	
3.2 Cold contacts: NO.	

- 3.3 Scheduling / scattering: DK
- 3.4 Contact history: DK
- 3.5 Min number of contacts: DK
- 2.6 Max number of contacts: DK

4. Questionnaire localization

- 4.1 Validation: No.
- 4.2 Pre-test: CAPI questionnaire was tested in the pilot which was carried out in July 2008 on 31 respondents.
- 4.3 Length of interview: Average length of interview: 59 minutes , with wide range (minimum 32 minutes, maximum 107 minutes) according to the composition of the household and the biography of the respondent.

Questionnaires

Structured questionnaire in German.

Data Collector(s)

TNS Infratest

Supervision

WAVE 1 ACTIONS

- 1. Dealing with nonresponse
 - 1.1 Screening: No.
 - 1.2 Refusal conversion: No specific training for this project, only general training
 - 1.3 Incentives: Yes, lottery ticket amounting to 10 €.

2. Tracking of sampled units

- 2.1 Respondent contact information: Yes, addresses (no email-addresses) of the respondent were collected. The addresses are only known by TNS-Infratest.
- 2.2 Other contact information: DK
- 2.3 Cards: A "thank-you-letter" and birthday- and holiday cards were sent to all the respondents (planned frequency of contacts with the respondents between the two waves: 3). Furthermore, a brochure with results of Wave 1 was sent.
- 2.4 Additional surveys: No
- 2.5 Administrative records: NA

WAVE 2 ACTIONS

- 1. Dealing with nonresponse
 - 1.1 Screening: Yes. The sending of letters between the two waves provided a chance to check for potentially changing addresses on a yearly basis. In addition to annual contacts, enquiries were also made to the residents' registration offices with regard to those individuals where our letters were returned by the post office and where the ensuing postal enquiries did not provide a valid address.
 - 1.2 Refusal conversion: DK
 - 1.3 Incentives: In order to achieve as high a response rate as possible, the respondents who had given an interview received as an incentive a ticket for the ARD television lottery by post following their participation.

2. Tracking of sampled units

- 2.1 Respondent contact information: Yes, addresses (no email-addresses) of the respondent were collected. The addresses are only known by TNS-Infratest.
- 2.2 Other contact information: DK
- 2.3 Cards: Regular panel maintenance was carried out in the interim period by TNS Infratest. A "thank-you-letter" and birthday- and holiday cards were sent to all the respondents willing to be re-contacted. Also the so called GGP-Journal in the first 2 years (end of 2005 and 2006) was sent. Two letters announcement of the beginning of the next wave at the end of 2007 and in 2008.
- 2.4 Additional surveys: No
- 2.5 Administrative records: Yes (Einwohnermeldeamt)

A field-work time of three months from mid-September 2008 to mid-December 2008 had originally been planned. Because only n=3,018 interviews that had been carried out by the end of December and because of a relatively promising share among those who were not reached, TNS Infratest Sozialforschung decided to invest in additional, unplanned post-processing. A total of n=3,285 questionnaires had been carried out by the end of March 2009.

Data Processing & Appraisal

Data Editing

WAVE 2 CLEANING OPERATIONS

The main cleaning operations were:

- a) Editing of raw data and pre-harmonization: Renaming all variables names, (Re-)Translating all labels from German to English, Recoding variables if structure differed from the harmonization standard, Checking and coding of user missing values and system missing values, Checking of consistency of filters, Coding of basic information on education into ISCED-97 and occupation into ISCO-88.
- b) Checks for inconsistent results and logical consistency: checking the internal plausibility (e.g. household roster, dates), plausibility between survey waves (e.g. sex and year of birth)

If possible corrections have been conducted. Otherwise cases or responses had been removed or documented.

a5112_1dig a5114_1dig.

IMPROVEMENTS INTRODUCED WITH V.4.1. (April 2012):

- Variables corrected: a106b a108 a109_1 a109_2 a110 a111 a218 a219 a303b a304 a305 a306 a316b a317 a318 a319 a374b
a375 a376 a377 a513b a514 a515 a533b a534 a535 a540 a521u a541u a5106a_b a5106a_s a5107.

- Value labels defined: a204cu_5 a204cu_6.

IMPROVEMENTS INTRODUCED WITH V.4.0 (March 2012):

- New constructed variables: asex aage abyear aeduc aactstat aparstat amarstat anpartner ankids ahhsz ahhstype.

- New consolidated variables on respondents' current activity: a870 a871m a871y a873 a874 a875.

- New consolidated variables on respondents' partners current activity: a940 a941m a941y a943 a945.

- Variables previously unavailable, now available: a108 a304

- Variables corrected: a602 (with consequences on the response rate of subsequent variables), a622, a623, a624, a625, a626,
a627*, a628*, a629*.

- Changes in the variable/value labels: aregion (previously 5 digit country specific list; now four digit country specific list),
atype (previously country specific list range 1400,1409; now country specific list range 1401,1410).

IMPROVEMENTS INTRODUCED WITH V.3.0 (August 2010):

- New consolidated variables: a370 a383 a384.

- Changes in the variable/value labels: a203b_* (wrong labels in version v2.2., now corrected), a1003 and a1004 (coded as
first, second, third... mentioned in version V2.2., now coded coded per item as a yes/no question).

- Variables renamed: a203c_1u...`i'u and a204c_1u...`i'u renamed respectively as a203cu_1...`i' and a204cu_1...`i'.

FIRST DATASET RELEASED: V. 2.2. (March 2010).

Processing Checks

DATA HARMONISATION

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonised with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

GGG_Wave2_Germany_V.1.2.

# Cases	3226
# Variable(s)	1192
File Structure	Type: relational Key(s): arid (R identification number)

File Content

GGG Wave 2

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.

The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.

Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.

Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.

A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a19_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".

Version

Harmonized dataset, GGS Wave2, version 1.2.

IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.2 (April 2015)

The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.

- Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrspartafterw1, blivingwithpartner, bchildprevp, bchildprevp, bfemage, bmaleage, bfemeduc , , bmaleeduc, bfertint, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl , bhhtype.
- Variables derived from month and year variable: b121AgeR, b150AgeR , bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Agb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP, b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.
- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour_x.
- Variables derived from frequency and unit variables: b203c_xw, b204c_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.
- Occupation variables recoded into ISCO-88 1 digit: b828_1dig, b832_1dig, b861_1dig, b917_1dig, b921_1dig, b933_1dig.
- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime_1801, bnumparttime_1802, bnumpartfulltime_1803, bnumfulltime_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876_xAgeR, bn877_xAgeR, bn878xAgeR, bn879_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

IMPROVEMENTS INTRODUCED WITH V.1.1. (March 2013):

- Variables corrected: b510 b530 b626.
- Changes in the variable/value labels: b703b (value 5 previously without label; now value 5 recoded into missing, no valid answer), b906b (previously without labels, now with labels).
- Variables dropped because not part of the GGS Core Questionnaire: b257* and b258*.

IMPROVEMENTS INTRODUCED WITH V.1.1. in the derived variables calculated for Nesstar GGS micro data files (March 2013):

- Variables corrected: b203c_*w and b204c_*w (previously frequencies greater than 7 were put equal to system missing, now they are put as equal to seven).
- Variables previously dropped and now available: bint_st and bint_pr.

FIRST DATASET RELEASED: V. 1.0. (November 2012).

Processing Checks**DATA HARMONISATION**

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

Variables List

Dataset contains 2490 variable(s)

File GGS_Wave1_Germany_V.4.2.

Definition Q 001

Pre-question Interviewer Instruction: Write in the time and date when the interview starts.

Literal question Interview started at...on...

Interviewer's instructions Interviewer Instruction: Read the following text.
This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483625] [Missing=*/6]
Statistics [NW/ W]	[Valid=10017 /-] [Invalid=0 /-]
Definition	Consolidated variable.
Notes	Copied from the Household grid (variable ahg4_1).

Value	Label	Cases	Percentage
1	male	4610	46.0%
2	female	5407	54.0%
6	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

ahhtype: Household type Respondent

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/96]
Statistics [NW/ W]	[Valid=10017 /-] [Invalid=0 /-]
Definition	Consolidated variable.
Notes	<p>Generated from household grid (variables ahg3_*). Respondents' households were classified into groups according to the criteria explicated below.</p> <p>1 "living alone": If the HH grid contains only R (hsize=1).</p> <p>2 "single parent": If HH grid contains R, at least one child (codes 2-6), and no parent.</p> <p>3 "living with parents": If HH grid contains R, at least one parent (codes 7, 8), and no child.</p> <p>4 "single parent living with parents":</p>

File : GGS_Wave1_Germany_V.4.2.

ahhtype: Household type Respondent

If HH grid contains R, at least one child and one parent, but no partner.
 5 "couple with no children":
 If HH grid contains R, his/her partner (code 1); no child, nor parent.
 6 "couple with children"
 If HH grid contains R, his/her partner, at least one child, and no parent.
 7 "couple with parents"
 If HH grid contains R, his/her partner, at least one parent, and no child.
 8 "couple with parents and children"
 If HH grid contains R, his/her partner, at least one parent and one child.
 9 "other types"
 HH types different from 1-8, that may include codes 9-17 on ahg3_* (e.g., Rs living with no relatives).

Value	Label	Cases	Percentage
1	living alone	2510	25.1%
2	single parent	596	5.9%

numdissol: Total number of partnerships dissolutions

Information [Type= discrete] [Format=numeric] [Range= 0-4] [Missing=*]

File : GGS_Wave1_Germany_V.4.2.

numdissol: Total number of partnerships dissolutions

Statistics [NW/ W] [Valid=10017 /-] [Invalid=0 /-]

Definition Derived variable

Notes The number of non-empty slots in the "Partnership history" grid (a343_); core questionnaire, section 3, page 22.
Note that this variable only refers to resident partners.

Value	Label	Cases	Percentage
0		8252	82.4%
1		1397	13.9%
2		294	2.9%
3		58	0.6%
4		13	0.1%
5		2	0.0%
6		1	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

numdivorce: Total number of partnerships ending in divorce

Information [Type= discrete] [Format=numeric] [Range= 0-3] [Missing=*]

Statistics [NW/ W] [Valid=10017 /-] [Invalid=0 /-]

Definition Derived variable

Notes The number of previous partners with whom Respondent was married AND broke up (code 1 on question 327 (a335a) and code 1 on question 330 (a343), "Partnership history" grid).
Not available for Australia as partnership history grid differs in Australian survey

Value	Label	Cases	Percentage
0		8906	88.9%
1		1003	10.0%
2		101	1.0%
3		7	0.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

nummarriage: Total number of marriages

Information [Type= discrete] [Format=numeric] [Range= 0-3] [Missing=*]

Statistics [NW/ W] [Valid=10017 /-] [Invalid=0 /-]

Definition Derived variable

Notes The number of previous partners with whom Respondent was married (code 1 on question 327 "Partnership history" grid) PLUS the current marriage if one exists (code 1 on question 302 / variable a302a OR code 1 on question 310 / variable a314a).

Value	Label	Cases	Percentage
0		3360	33.5%
1		6194	61.8%
2		429	4.3%
3		32	0.3%
4		2	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

numpartnerships: Total number of partnerships

Information [Type= discrete] [Format=numeric] [Range= 0-4] [Missing=*]

File : GGS_Wave1_Germany_V.4.2.

numpartnerships: Total number of partnerships

Statistics [NW/ W]	[Valid=10017 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	The total number of partnership dissolutions (see variable numdissol) PLUS the current partnership if one exists (partner is present in the Household grid). Note that this variable only refers to resident partners, past and present. Not available for Australia as partnership history grid differs in Australian survey

Value	Label	Cases	Percentage
0		2408	24.0%
1		6484	64.7%
2		911	9.1%
3		174	1.7%
4		34	0.3%
5		4	0.0%
6		2	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

childprevp: any children from previous partnership

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=10017 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent had children with any previous partner (question 332 (a345), "Partnership history" grid); "No" otherwise. Data not available for Australia, Hungary, Estonia or Italy.

Value	Label	Cases	Percentage
1	Yes	1040	10.4%
2	No	8977	89.6%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

femage: If partnered: age of female

Information	[Type= discrete] [Format=numeric] [Range= 14-85] [Missing=*]
Statistics [NW/ W]	[Valid=3730 /-] [Invalid=6287 /-]
Definition	Derived variable
Universe	If R has a partner
Notes	This variable indicates the age of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents age is used (aage.) If the respondent is male and in a relationship with a female then their age is derived depending on the nature of the relationship. For a resident partner the age was copied from the Household grid (ahg5_); for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y). Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset. Note that this variable does not have a value for same-sex partnerships.

# a107AgeR: R's age of starting to live in country of interview			
Information	[Type= discrete] [Format=numeric] [Range= 0-63] [Missing=*997/998/999]		
Statistics [NW/ W]	[Valid=1197 /-] [Invalid=8820 /-] [Mean=23.97 /-] [StdDev=14.608 /-]		
Definition	Derived variable from Q 107 core questionnaire		
Universe	If code 2 on Q 105		
Literal question	In what month and year did you first start living permanently in [country]?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the country of interview was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"		
	Data is not available for Estonia.

# a150AgeR: R's age of achieving the current education level			
Information	[Type= discrete] [Format=numeric] [Range= 0-69] [Missing=* /997/998/999]		
Statistics [NW/ W]	[Valid=7768 /-] [Invalid=2249 /-] [Mean=21.257 /-] [StdDev=5.417 /-]		
Definition	Derived variable from Q 122 core questionnaire		
Literal question	In what month and year did you reach that level?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".		

a150AgeR: R's age of achieving the current education level

# a302bTdiff: Time elapsed between start of living together and marriage (years)			
Information	[Type= discrete] [Format=numeric] [Range= -40-52] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=4743 /-] [Invalid=5274 /-] [Mean=1.396 /-] [StdDev=2.605 /-]		
Definition	Derived variable from Q 302.b core questionnaire		
Universe	If code 1 on question 302.a		
Literal question	In what month and year did you marry?		
Notes	The time of starting to live together was deducted from the answer to Q 301. If information on the month at start living together / month of marriage was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". If respondents got married before living together then the observation is excluded.

a303cAgeP: Partner's age of obtaining permanent residence

Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=813 /-] [Invalid=9204 /-] [Mean=26.303 /-] [StdDev=13.161 /-]
Definition	Derived variable from Q 303.c core questionnaire
Universe	If code 2 on Q 303.a
Literal question	In what month and year did he/she first start living permanently in [country]?
Notes	Partner's time of birth was either deduced from HH grid. If information on partner's month of birth / month when partner started living permanently in country was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a316cAgeP: Partner's age at start of permanent residence

Information	[Type= discrete] [Format=numeric] [Range= 10-34] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=59 /-] [Invalid=9958 /-] [Mean=17 /-] [StdDev=9.512 /-]
Definition	Derived variable from Q 312.c core questionnaire
Universe	If code 2 on Q 312.a
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?
Notes	Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

Definition	Q 323.c core questionnaire		
Universe	If R is currently NOT living with a partner		
Pre-question	Although you may feel that the decision to start living together with a partner is yours (and your partner's), it is likely that others have opinions about what you should do. I'm going to read out some statements about what other people might think about you starting to live with a/your partner during the next three years. Please tell me to what extent you agree or disagree with these statements, choosing your answer from this card. Card 323: Agreement Scale		
Literal question	Your children think that you should start living together with a/your partner		
Value	Label	Cases	Percentage
1	strongly agree	17	30.9%
2	agree	6	10.9%
3	neither agree nor disagree	9	16.4%
4	disagree	1	1.8%
5	strongly disagree	22	40.0%
7	does not know	3	
8	refusal	0	
9	no response/not applicable	3660	
Sysmiss		6299

a374cAgeP: Partner's age of obtaining permanent residence

Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*997/998/999]
Statistics [NW/ W]	[Valid=872 /-] [Invalid=9145 /-] [Mean=25.673 /-] [StdDev=13.151 /-]
Definition	Consolidated variable from variables a303AgeP and a316cAgeP (derived variables from Q 304.c and Q 312.c core questionnaire).
Universe	If R's partner not born in [country]
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?
Notes	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a822AgeR: R's age at becoming a homemaker

Literal question	Since what month and year are you a homemaker?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of becoming a homemaker was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

Literal question	Do you intend to take a job or start a business within the next three years?		
Value	Label	Cases	Percentage
1	definitively not	2	14.3%
2	probably not	1	7.1%

# a826: Intention to take a job within the next 3 yrs			
Value	Label	Cases	Percentage
3	probably yes	2	14.3%
4	definitively yes	9	64.3%
1601	no	0	
1602	yes	0	
7	does not know	1	
8	refusal	0	
9	no response/not applicable	2	
Sysmiss		10000	
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
# a827: Any job/business just before starting military or social service			
Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]		
Statistics [NW/ W]	[Valid=16 /-] [Invalid=10001 /-]		
Definition	Q 827 core questionnaire		
Universe	If code 9 on Q 801		
Literal question	Did you have a job or business directly before your military or social service started?		
Value	Label	Cases	Percentage
1	yes	5	31.2%
2	no	11	68.8%
7	does not know	1	
8	refusal	0	
9	no response/not applicable	0	
Sysmiss		10000	
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
# a828: Last occupation (see code ISCO)			
Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/9997/9998/9999]		
Statistics [NW/ W]	[Valid=3341 /-] [Invalid=6676 /-]		
Definition	Q 828 core questionnaire DEU: only country specific values "1401-farmer", "1402-highly skilled profession (medicin, lawyer etc.)", "1403-self-employed", "1404-civil servant, judge, officer", "1405-clerk", "1406-worker", "1407-still in training", "1408-paid family worker".		
Universe	R is unemployed / student / retired / ill or permanently disabled / homemaker / in military or social service and had a job directly before this current status		
Literal question	What was your last occupation? Please describe the principal activity you performed.

a871AgeR: R's age at start of current activity status

Information	[Type= discrete] [Format=numeric] [Range= 0-73] [Missing=*997/998/999]
Statistics [NW/ W]	[Valid=9239 /-] [Invalid=778 /-] [Mean=37.331 /-] [StdDev=15.598 /-]
Definition	Generated from consolidated variables a871m and a871y.
Literal question	In what month and year did you start this leave? In what month and year did you become unemployed? Since what month and year are you a student, studying at school, or in vocational training? In what month and year did you retire? Since what month and year are you a homemaker? In what month and year did you start this job or business?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December" This variable is not available for Belgium.

a917_1dig: Partner's last occupation (see code ISCO)

Information	[Type= discrete] [Format=numeric] [Range= 0-9] [Missing=*/9997/9998/9999]
Statistics [NW/ W]	[Valid=1960 /-] [Invalid=8057 /-]
Definition	Derived variable from Q 917 core questionnaire
Universe	R is partnered, partner is unemployed / student / retired / ill or permanently disabled / homemaker / in military or social service and had a job directly before this current status.
Pre-question	I would now like to ask a few questions about your partner's/spouse's previous job or business. If he/she was engaged in two or more jobs or businesses, I would like you to tell me only about the one in which he/she spent most of his/her working hours.
Literal question	What was his/her last occupation? Please describe the principal activity he/she performed.
Notes	Occupations were re-coded according to 1 digit ISCO codes

Value	Label	Cases	Percentage
0	Armed Forces	0	
1	legislators, senior officials and managers	1960	100.0%
2	professionals	0

Definition	Derived variable from Q 921 core questionnaire
Universe	If code 1 or 2 on Q 901 OR code 1 on Q 920
Pre-question	I would now like to ask a few questions about your partner's/spouse's current job or business. If he/she is engaged in two or more jobs or businesses, I would like you to tell me now only about the one in which he/she spends most of his/her working hours.
Literal question	What is your partner's/spouse's current occupation? Please describe the principal activity he/she performs.

# a941AgeP: Partner's age at start of current activity status			
Information	[Type= discrete] [Format=numeric] [Range= 0-72] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=2344 /-] [Invalid=7673 /-] [Mean=43.526 /-] [StdDev=17.386 /-]		
Definition	Generated from consolidated variables a941m and a941y.		
Universe	If R has a partner.		
Literal question	<p>In what month and year did your partner/spouse start this leave? In what month and year did he/she become unemployed? Since what month and year is your partner/spouse a student, in school, or in vocational training? In what month and year did your partner/spouse retire? Since what month and year is your partner/spouse a homemaker?</p>		
Notes	<p>Partner's time of birth was deducted from HH grid (co-resident partner) or Q 311 (non resident partner). If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". In Belgium if the partner is still in education (a941y==2301) then the variable was coded as system missing.</p>

a5116AgeR: R's age of first time living separately from parents >= 3 mnths

Information	[Type= discrete] [Format=numeric] [Range= 0-73] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=7940 /-] [Invalid=2077 /-] [Mean=20.161 /-] [StdDev=5.416 /-]
Definition	Derived variable from Q 5116 core questionnaire
Universe	If R does not currently live with parents/a parent
Literal question	In what month and year did you for the first time start living separately from your parents for at least three months?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when first time living separately from parents was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

Value	Label	Cases	Percentage

Pre-question	Interviewer Instruction: Write in the time and date when the interview starts.
Literal question	Interview started at...on...

Interviewer's instructions	<p>Interviewer Instruction: Read the following text.</p> <p>This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.</p> <p>The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.</p> <p>Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.</p> <p>We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.</p>

bcoresgrandp: Respondent has coresident grandparent or great-grandparent

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=* /6]
Statistics [NW/ W]	[Valid=3226 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent's or Respondent's partner's grandparent or great-grandparent is present in the Household grid (code 12); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	6	0.2%
2	No	3220	99.8%
6	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bcoressibl: Respondent has coresident sibling

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=* /6]
Statistics [NW/ W]	[Valid=3226 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent's or Respondent's partner's sibling is present in the Household (codes 13, 14); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	51	1.6%
2	No	3175	98.4%
6	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bhhtype: Household type Respondent

Information	[Type= discrete] [Format=numeric] [Range= 1-96] [Missing=* /97/98/99]
Statistics [NW/ W]	[Valid=3226 /-] [Invalid=0 /-]
Definition	Consolidated variable.
Notes	<p>Generated from household grid (variables bhg3_*). Respondents' households were classified into groups according to the criteria explicated below.</p> <p>1 "living alone": If the HH grid contains only R (hhsz=1).</p> <p>2 "single parent": If HH grid contains R, at least one child (codes 2-6), and no parent.</p> <p>3 "living with parents": If HH grid contains R, at least one parent (codes 7, 8), and no child.</p> <p>4 "single parent living with parents": If HH grid contains R, at least one child and one parent, but no partner.</p> <p>5 "couple with no children": If HH grid contains R, his/her partner (code 1); no child, nor parent.</p> <p>6 "couple with children" If HH grid contains R, his/her partner, at least one child, and no parent.</p> <p>7 "couple with parents" If HH grid contains R, his/her partner, at least one parent, and no child.</p> <p>8 "couple with parents and children" If HH grid contains R, his/her partner, at least one parent and one child.</p> <p>9 "other types" HH types different from 1-8, that may include codes 9-17 on bhg3_* (e.g., Rs living with no relatives).</p>

File : GGS_Wave2_Germany_V.1.2.

bhhtype: Household type Respondent

Value	Label	Cases	Percentage
1	living alone	683	21.2%
2	single parent	210	6.5%
3	living with parents	71	2.2%
4	single parent living with parents	4	0.1%

bnumworkstatures: The number of non-empty slots in the Activity and Education History grid

Information [Type= discrete] [Format=numeric] [Range= 0-26] [Missing=*/997/998/999]

Statistics [NW/ W] [Valid=3226 /-] [Invalid=0 /-]

Definition Derived variable from Q 801 (variables bn871_*).

Pre-question Now, we are going to talk about your work and studies since your 16th birthday. We are only interested in activities that lasted at least 3 months. Please choose from the activities on the card. If more than one activity applies to a certain period of time, for example, you were working and studying at the same time, please choose the activity in which you spent most time! Card 104

Literal question Which of the items on the card best describes what have you mainly been doing since age 16?

Notes The number of non-empty slots in the Activity and Education History grid (Q 801, variable bn871_*).

Value	Label	Cases	Percentage
0		1	0.0%
1		247	7.7%
2		479	14.8%
3		751	23.3%
4		604	18.7%
5		446	13.8%
6		267	8.3%
7		164	5.1%
8		102	3.2%
9		68	2.1%
10		97	3.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bnumstudentstatures: The number of times R has been student, in school, in vocational training since age 16

Information [Type= discrete] [Format=numeric] [Range= 0-6] [Missing=*/997/998/999]

Statistics [NW/ W] [Valid=3226 /-] [Invalid=0 /-]

Definition Derived variable from Q 801 (variables bn871_*).

Pre-question Card 104

Literal question Which of the items on the card best describes what have you mainly been doing since age 16?

File : GGS_Wave2_Germany_V.1.2.

bnumstudentstatuses: The number of times R has been student, in school, in vocational training since age 16

Notes The number of times R has been student, in school, in vocational training since age 16 (code 1 on Q 801, variables bn871_*).

Value	Label	Cases	Percentage
0		829	25.7%

bnnumboth: The number of R's working statuses that have changed from part-time to full-time since age 16

Information	[Type= discrete] [Format=numeric] [Range= 0-4] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=3226 /-] [Invalid=0 /-]
Definition	Derived variable from Q 805 (variables bn875_*).
Literal question	Was it full time or part time?
Notes	The number of R's working statuses that have changed from part-time to full-time (or the other way around) since age 16 (code 3 on Q 805, variables bn875_*).

Value	Label	Cases	Percentage
0		2860	88.7%
1		353	10.9%
2		9	0.3%
3		3	0.1%
4		1	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bndurstudentstatus: Total duration (in month) of Rs working statuses as student, in school, in vocational training since age 16

Information	[Type= discrete] [Format=numeric] [Range= 0-768] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=2336 /-] [Invalid=890 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as student, in school, in vocational training since age 16 (code 1 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

bnduremplstatus: Total duration (in month) of Rs working statuses as employed since age 16

Information	[Type= discrete] [Format=numeric] [Range= 0-799] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=2900 /-] [Invalid=326 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as employed since age 16 (code 2 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

bndurselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16

Information	[Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=339 /-] [Invalid=2887 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as self employed since age 16 (code 3 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# bndurmatleavestatuses: Total duration (in month) of Rs working statuses as in maternity leave since age 16			
Information	[Type= discrete] [Format=numeric] [Range= 0-488] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=3226 /-] [Invalid=0 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as in maternity leave since age 16 (code 9 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

b372bAgeR: R's age of marrying current spouse

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=1799 /-] [Invalid=1427 /-]
Definition	Derived variables from consolidated variables b372bm and b372by (variables obtained from Q 304 and 311: variables bn304m, b335bm_*, bn304y, b335by_*; if partner is the same then W1 the data is merged from W1, variables a302by and a302bm). It only refers to co-resident partner.
Universe	If R has a co-resident partner.
Literal question	In what month and year did you marry?

b372bAgeR: R's age of marrying current spouse

Notes R's time of birth was deducted from HH grid. If information on the month of birth / month when married current spouse was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

b374cAgeP: Partner's age of obtaining permanent residence

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=221 /-] [Invalid=3005 /-]

b374cAgeP: Partner's age of obtaining permanent residence

Definition	Derived variable from consolidated variables b374cm and b374cy (variables obtained from Q 322c and 331c: variables b303cm, b316cm, b303cy, b316cy; if partner is the same then W1 the data is merged from W1, variables a303cm and a303cy).
Universe	If R has a partner (co-resident or non-resident)
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?
Notes	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 330. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

b871AgeR: R's age at start of current activity status

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=2816 /-] [Invalid=410 /-]
Definition	Derived variable generated from consolidated variables a871m and a871y (obtained from Q 930, variables b833m and b833y)
Literal question	In what month and year did you start this job or business?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

bn878_2AgeR: R's age at the start of last part time

Information	[Type= discrete] [Format=numeric] [Range= 18-9999] [Missing=* /997/998/999]
Statistics [NW/ W]	[Valid=9 /-] [Invalid=3217 /-]
Definition	Derived variable from Q 808
Universe	If code 3 on Q 805 (variable bn875_1 ... bn875_*)
Literal question	(If there were more subsequent periods:) When did the last period of part time work start?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when started last part time was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
# bn1402c: Manner in which others influenced respondent			
Information		[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*/7/8/9]	
Statistics [NW/ W]		[Valid=229 /-] [Invalid=2997 /-]	
Value	Label	Cases	Percentage
1	the person answered the question instead of R	26	11.4%
2	R was reluctant to answer	53	23.1%
3	children were asking attention of R	29	12.7%
4	other specify	121	52.8%
7	does not know	0	
8	refusal	0	
9	no response/not applicable	0	
Sysmiss		2997	
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
# bn1403: R's willingness to answer			
Information		[Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*/97/98/99]	
Statistics [NW/ W]		[Valid=3226 /-] [Invalid=0 /-]	
Definition		Q 1403	
Literal question		All in all, how willing was the respondent to answer the questions?	
Value	Label	Cases	Percentage
1	not willing at all	10	0.3%
2		4	0.1%
3		8	0.2%
4		11	0.3%
5		31	1.0%
6		49	1.5%
7		88	2.7%
8		236	7.3%
9		327	10.1%
10	very willing	2462	76.3%
97	does not know	0	
98	refusal	0	
99	no response/not applicable	0	

bn1403: R's willingness to answer

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bn1404: Reliability of R's information

Information	[Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*]
Statistics [NW/ W]	[Valid=3226 /-] [Invalid=0 /-]
Definition	Q 1404
Literal question	How would you judge the information the respondent gave?

Value	Label	Cases	Percentage
1	not reliable at all	4	0.1%
2		1	0.0%
3		1	0.0%
4		2	0.1%
5		14	0.4%
6		21	0.7%
7		61	1.9%
8		188	5.8%
9		374	11.6%
10	very reliable	2560	79.4%
97	does not know	0	
98	refusal	0	
99	no response/not applicable	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bn1405: R same person than in Wave 1

Information	[Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*]
Statistics [NW/ W]	[Valid=3226 /-] [Invalid=0 /-]
Definition	Q 1405
Literal question	Would you say that the respondent answering to you was also interviewed in the previous wave 3 years ago?

Value	Label	Cases	Percentage
1	I am convinced that she/he was	3031	94.0%
2	It is very likely that she/he was	130	4.0%
3	I am not certain	45	1.4%
4	It is very likely that she/he was not	9	0.3%
5	I am convinced that she/he was not	11	0.3%
97	does not know	0	
98	refusal	0	
99	no response/not applicable	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.
