Generations and Gender Survey Hungary Wave 1 & Wave 2 (GGS Hungary Wave 1 & Wave 2)

Életünk Fordulópontjai - Turning points of the Life-Course program (2001-)

| Overview | |
|--|--------------|
| Identification | GGS.W1.W2.16 |
| <p>Abstract</p> <p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion".</p> <p>The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> - Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets. - A broad age range. It includes respondents between the ages of 18 and 80. - A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals. - A large sample size. It has an average of 9,000 respondents per country at Wave 1. - A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior. - Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts. | |

| Sampling |
|---|
| <p><u>Sampling Procedure</u></p> <p>WAVE 1 SAMPLING PROCEDURE</p> <p>The Hungarian GGS Wave 1 corresponds to Wave 2 of the national study "Turning points of the Life-Course program (2001-)", which was conducted in 2004/5 on 13,642 individuals.</p> <p>The sample size of the Wave 1 of the national study "Turning points of the Life-Course program (2001-)" was equal to 16,363 individuals. Information on the sampling method applied for this study can be found on its webpage (http://www.demografia.hu/index.php/kutatasok/eletuenk-fordulopontjai/eletuenk-fordulopontjai-adatgyjtesi-program), as well as under the filed "Other Study Description Materials - Other References Notes".</p> <p>WAVE 2 SAMPLING PROCEDURE</p> <p>The longitudinal sub-sample consists of 25-82 year-old respondents who took part at Wave 1 and agreed to be re-contacted for Wave 2. A new component was added: 20-25 years old children of the respondents. In total 83.2% of the interview were successful (i.e. 10,641 interviews).</p> |
| <p><u>Response Rate</u></p> <p>WAVE 2</p> <p>In total 83.2% of the interview were successful (i.e. 10,641 interviews).</p> |
| <p><u>Weighting</u></p> <p>WAVE 1 and WAVE 2 WEIGHT VARIABLES</p> <p>They are standardized weights based on country-specific population weights.</p> |

- Variables derived from frequency and unit variables:

a205mnth,a241mnth,a325mnth,a355mnth,a359mnth,a363mnth,a367mnth,a521mnth,a541mnth,a1008mnth,a1102mnth;
a203c_?w a204c_?w.

- Occupation variables recoded into ISCO-88 1 digit: a828_1dig a832_1dig a861_1dig a917_1dig a921_1dig a933_1dig
a5112_1dig a5114_1dig.

IMPROVEMENTS INTRODUCED WITH V.4.1. (April 2012):

- Variables corrected: amarstat, anpartner, ankids, a5115, a622 (routing now corrected, with consequences for valid responses on subsequent variables), a626, a874(routing erroneous)

- Variables now available: a203cu_*, a204cu_*

- User Missing value now labeled: a384, a720, a828, a866*, a867_1601, a938*, a939*

IMPROVEMENTS INTRODUCED WITH V.4.0 (March 2012):

- New constructed variables: asex, aage, abyear, aeduc, aactstat, aparstat, amarstat, anpartner, ankids, ahhsiz, ahhtype

- New consolidated variables on respondents' current activity: a870, a871m, a871y, a873, a874, a875

- New consolidated variables on respondents' partners current activity: a940, a945

- Variables corrected: a383 (age of current partner now rounded), a602 (corrected, with consequences on response rate to subsequent questions), a612, a622, a624, a625, a626, a627*, a628*, a629*

IMPROVEMENTS INTRODUCED WITH V.3.0 (October 2010):

- New consolidated variables: a370, a383, a384

- Variables renamed: a203c_1u...`i'u and a204c_1u...`i'u renamed into respectively a204c_1u...`i'u and a204cu_1...`i'

- Variables for which country-specific values are recoded into GGS values: a148, a308, a379, a5113, a5115 (now these variables have ISCED categories).

- Other changes in variable values: a1003 and a1004 were previously coded as first, second, third... mentioned, now they are coded per item as a yes/no question.

- Variables that are not country-specific anymore: a408_`i'

FIRST DATASET RELEASED: V. 1.8. (March 2010).

Processing Checks

DATA HARMONISATION

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

GGG_Wave2_Hungary_V.1.2.

| | |
|-----------------------|--|

| # Variable(s) | 1187 |
| File Structure | Type: relational Key(s): arid (R identification number) |

File Content

GGG Wave 2

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.

The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.

Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.

Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.

A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a19_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".

Version

Harmonized dataset, GGS Wave2, version 1.2.

IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.2 (April 2015)

The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.

- Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrespartaafterw1, blivingwithpartner, bchildprevp, bchildprevp, bfemage, bmaleage, bfemeduc, , bmaleeduc, bfertintent, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl, bhhtype.
- Variables derived from month and year variable: b121AgeR, b150AgeR, bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Agb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP, b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.
- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour_x.
- Variables derived from frequency and unit variables: b203c_xw, b204c_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.
- Occupation variables recoded into ISCO-88 1 digit: b828_1dig, b832_1dig, b861_1dig, b917_1dig, b921_1dig, b933_1dig.
- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomeststatuses, bnummatleaveststatuses, bnumparleaveststatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime_1801, bnumparttime_1802, bnumpartfulltime_1803, bnumfulltime_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomeststatuses, bndurmatleaveststatuses, bndurparleaveststatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876_xAgeR, bn877_xAgeR, bn878xAgeR, bn879_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

FIRST DATASET RELEASED: V.1.1. (November 2013).

Processing Checks**DATA HARMONISATION**

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted

according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

Variables List

Dataset contains 2084 variable(s)

Definition Q 001

Pre-question Interviewer Instruction: Write in the time and date when the interview starts.

Literal question Interview started at...on...

Interviewer's instructions Interviewer Instruction: Read the following text.
This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know. |

| Value | Label | Cases | Percentage |
|-------|----------------------------|-------|------------|
| 2004 | | 12664 | 93.5% |
| 2005 | | 876 | 6.5% |
| 9997 | does not know | 0 | |
| 9998 | refusal | 0 | |
| 9999 | not applicable/no response | 0 | |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

aage: Age Respondent

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

aparstat: Current Partner Status

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 1-2147483625] [Missing=*/6] |
| Statistics [NW/ W] | [Valid=13538 /-] [Invalid=2 /-] |
| Definition | Consolidated variable. |
| Notes | Copied from consolidated variable a370. |

| Value | Label | Cases | Percentage |
|-------|----------------------|-------|------------|
| 1 | co-resident partner | 8882 | 65.6% |
| 2 | non-resident partner | 581 | 4.3% |
| 3 | no partner | 4075 | 30.1% |
| 6 | unknown | 2 | |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

numdissol: Total number of partnerships dissolutions

| | |
|--------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 0-4] [Missing=* |
|--------------------|---|

File : GGS_Wave1_Hungary_V.4.2.

numdissol: Total number of partnerships dissolutions

Statistics [NW/ W] [Valid=13540 /-] [Invalid=0 /-]

Definition Derived variable

Notes The number of non-empty slots in the "Partnership history" grid (a343_); core questionnaire, section 3, page 22.
Note that this variable only refers to resident partners.

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 0 | | 10526 | 77.7% |
| 1 | | 2339 | 17.3% |
| 2 | | 540 | 4.0% |
| 3 | | 100 | 0.7% |
| 4 | | 30 | 0.2% |
| 5 | | 5 | 0.0% |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

numdivorce: Total number of partnerships ending in divorce

Information [Type= discrete] [Format=numeric] [Range= 0-3] [Missing=*]

Statistics [NW/ W] [Valid=13540 /-] [Invalid=0 /-]

Definition Derived variable

Notes The number of previous partners with whom Respondent was married AND broke up (code 1 on question 327 (a335a) and code 1 on question 330 (a343), "Partnership history" grid).

Not available for Australia as partnership history grid differs in Australian survey

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 0 | | 11272 | 83.2% |
| 1 | | 2001 | 14.8% |
| 2 | | 250 | 1.8% |
| 3 | | 16 | 0.1% |
| 5 | | 1 | 0.0% |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

nummarriage: Total number of marriages

Information [Type= discrete] [Format=numeric] [Range= 0-3] [Missing=*]

Statistics [NW/ W] [Valid=13540 /-] [Invalid=0 /-]

Definition Derived variable

Notes The number of previous partners with whom Respondent was married (code 1 on question 327 "Partnership history" grid) PLUS the current marriage if one exists (code 1 on question 302 / variable a302a OR code 1 on question 310 / variable a314a).

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 0 | | 2969 | 21.9% |
| 1 | | 9414 | 69.5% |
| 2 | | 1069 | 7.9% |
| 3 | | 82 | 0.6% |
| 4 | | 5 | 0.0% |
| 6 | | 1 | 0.0% |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

a150AgeR: R's age of achieving the current education level

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 0-69] [Missing=*/997/998/999] |
| Statistics [NW/ W] | [Valid=1074 /-] [Invalid=12466 /-] [Mean=23.471 /-] [StdDev=5.492 /-] |
| Definition | Derived variable from Q 122 core questionnaire |
| Literal question | In what month and year did you reach that level? |
| Notes | R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". Data is not available for Norway. |

| # a917: Partner's last occupation (see code ISCO) | | | |
|--|---|--------------|-------------------|
| Information | [Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/9997/9998/9999] | | |
| Statistics [NW/ W] | [Valid=3449 /-] [Invalid=10091 /-] | | |
| Definition | Q 917 core questionnaire DEU: only country specific values "1401-farmer", "1402-highly skilled profession (medicin, lawyer etc.)", "1403-self-employed", "1404-civil servant, judge, officer", "1405-clerk", "1406-worker", "1407-still in training", "1408-paid family worker". | | |
| Universe | R is partnered, partner is unemployed / student / retired / ill or permanently disabled / homemaker / in military or social service and had a job directly before this current status. | | |
| Pre-question | I would now like to ask a few questions about your partner's/spouse's previous job or business. If he/she was engaged in two or more jobs or businesses, I would like you to tell me only about the one in which he/she spent most of his/her working hours. | | |
| Literal question | What was his/her last occupation? Please describe the principal activity he/she performed. | | |

| Information | [Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9] | | |
| Statistics [NW/ W] | [Valid=13539 /-] [Invalid=1 /-] | | |
| Definition | Country specific variable (adapted from Q 1001 core questionnaire) HUN: the item "apartment with separate rooms" was added to Q 1001. | | |
| Pre-question | In the following I would like to talk with you about the financial situation of your household - about the things your household possesses and can afford as well as the income and transfers your household receives. Please look at this list. For each item, please indicate whether or not your household possesses it. It does not matter whether the item is owned, rented, or otherwise provided for your use. If you do not have an item, please indicate whether you would like to have it but cannot afford it, or do not have it for other reasons, e.g. you don't want or need it. Card 1001 | | |

| Definition | Q 001 |
| Pre-question | Interviewer Instruction: Write in the time and date when the interview starts. |
| Literal question | Interview started at...on... |
| Interviewer's instructions | <p>Interviewer Instruction: Read the following text.</p> <p>This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.</p> <p>The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.</p> <p>Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.</p> <p>We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.</p> |

bnnumworkstatures: The number of non-empty slots in the Activity and Education History grid

Information [Type= discrete] [Format=numeric] [Range= 0-26] [Missing=* /997/998/999]

Statistics [NW/ W] [Valid=10641 /-] [Invalid=0 /-]

Definition Derived variable from Q 801 (variables bn871_*).

File : GGS_Wave2_Hungary_V.1.2.

bnumworkstatuses: The number of non-empty slots in the Activity and Education History grid

Pre-question Now, we are going to talk about your work and studies since your 16th birthday. We are only interested in activities that lasted at least 3 months. Please choose from the activities on the card. If more than one activity applies to a certain period of time, for example, you were working and studying at the same time, please choose the activity in which you spent most time! Card 104

Literal question Which of the items on the card best describes what have you mainly been doing since age 16?

Notes The number of non-empty slots in the Activity and Education History grid (Q 801, variable bn871_*).

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 0 | | 2519 | 23.7% |
| 1 | | 1194 | 11.2% |
| 2 | | 2162 | 20.3% |
| 3 | | 1358 | 12.8% |
| 4 | | 1245 | 11.7% |
| 5 | | 720 | 6.8% |

bnduremplstatuses: Total duration (in month) of Rs working statuses as employed since age 16

| | |
|---------------------------|--|
| Information | [Type= discrete] [Format=numeric] [Range= 0-799] [Missing=*/997/998/999] |
| Statistics [NW/ W] | [Valid=7547 /-] [Invalid=3094 /-] |
| Definition | Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*). |
| Literal question | When did this period of [activity] start? When did this period of [activity] end? |
| Notes | Total duration (in month) of Rs working statuses as employed since age 16 (code 2 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference. |

bndurselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16

| | |
|--------------------|--|
| Information | [Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999] |
|--------------------|--|

| # bndurselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16 | | | |
|---|---|-------|------------|
| Statistics [NW/ W] | [Valid=1002 /-] [Invalid=9639 /-] | | |
| Definition | Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*). | | |
| Literal question | When did this period of [activity] start? When did this period of [activity] end? | | |
| Notes | Total duration (in month) of Rs working statuses as self employed since age 16 (code 3 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference. | | |

bndurilldisabledstatuses: Total duration (in month) of Rs working statuses as ill or disabled for a long time or permanently since age 16

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999] |
| Statistics [NW/ W] | [Valid=871 /-] [Invalid=9770 /-] |
| Definition | Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*). |
| Literal question | When did this period of [activity] start? When did this period of [activity] end? |
| Notes | Total duration (in month) of Rs working statuses as ill or disabled for a long time or permanently since age 16 (code 11 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference. |

b372bAgeR: R's age of marrying current spouse

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999] |
| Statistics [NW/ W] | [Valid=5355 /-] [Invalid=5286 /-] |
| Definition | Derived variables from consolidated variables b372bm and b372by (variables obtained from Q 304 and 311: variables bn304m, b335bm_*, bn304y, b335by_*; if partner is the same then W1 the data is merged from W1, variables a302by and a302bm). It only refers to co-resident partner. |
| Universe | If R has a co-resident partner. |
| Literal question | In what month and year did you marry? |
| Notes | R's time of birth was deducted from HH grid. If information on the month of birth / month when married current spouse was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". |

b374cAgeP: Partner's age of obtaining permanent residence

| | |
|---------------------------|--|
| Information | [Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999] |
| Statistics [NW/ W] | [Valid=22 /-] [Invalid=10619 /-] |
| Definition | Derived variable from consolidated variables b374cm and b374cy (variables obtained from Q 322c and 331c: variables b303cm, b316cm, b303cy, b316cy; if partner is the same then W1 the data is merged from W1, variables a303cm and a303cy). |
| Universe | If R has a partner (co-resident or non-resident) |
| Literal question | In what month and year did he/she first start living permanently in [COUNTRY]? |
| Notes | Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 330. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". |

b871AgeR: R's age at start of current activity status

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999] |
| Statistics [NW/ W] | [Valid=2112 /-] [Invalid=8529 /-] |
| Definition | Derived variable generated from consolidated variables a871m and a871y (obtained from Q 930, variables b833m and b833y) |
| Literal question | In what month and year did you start this job or business? |
| Notes | R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". |

| Literal question | When did the first/next period of part time work start? | | |
| Notes | R's time of birth was deducted from HH grid. If information on the month of birth / month when started part time was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". | | |

| Definition | Derived variable from Q 807 |
| Universe | If code 3 on Q 805 (variable bn875_1 ... bn875_*) |
| Literal question | When did this period of part time work end? |
| Notes | R's time of birth was deducted from HH grid. If information on the month of birth / month when ended part time was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". |

| Information | [Type= discrete] [Format=numeric] [Range= 0-100000000] [Missing=*] |
| Statistics [NW/ W] | [Valid=10641 /-] [Invalid=0 /-] |
| Definition | Country-specific variable adapted from Q 1108. It differs because values are in Hungarian Florins. |
| Literal question | If you add up the income from all sources received during the last 12 months, what is your household's total net income from all members including yourself? Please state the net income, which means after deductions for taxes and social security. |

b1008_1600: Average net income of all hh members during last 12 mnths (Hungarian Florinth)

Post-question Write in.
 If R gave the answer per month, probe:
 Does this sum describe the average income of your household over the last 12 months? [If not] Please tell me the average value over the last 12 months.

| # b1008u: Time unit of income | |
|-------------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 1-1802] [Missing=*/7/8/9] |
| Statistics [NW/ W] | [Valid=10641 /-] [Invalid=0 /-] |
| Definition | Q 1108 |
| Literal question | If you add up the income from all sources received during the last 12 months, what is your household's total net income from all members including yourself? Please state the net income, which means after deductions for taxes and social security. |
| Post-question | Write in. If R gave the answer per month, probe: Does this sum describe the average income of your household over the last 12 months? [If not] Please tell me the average value over the last 12 months. |

| Value | Label | Cases | Percentage |
