Generations and Gender Survey Lithuania Wave 1 & Wave 2 (GGS Lithuania Wave 1 & Wave 2)

Kartu ir lyciu tyrimas

Overview	
Identification	GGS.W1.W2.25
Abstract	
<p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion".</p> <p>The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> - Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets. - A broad age range. It includes respondents between the ages of 18 and 80. - A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals. - A large sample size. It has an average of 9,000 respondents per country at Wave 1. - A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior. - Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts. 	
Kind of Data	Survey data
Unit of Analysis	Individuals

Scope & Coverage	
Keywords	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
Time Period(s)	2006-2009
Countries	Lithuania
Geographic Coverage	
Whole territory of the Republic of Lithuania.	
Universe	
WAVE 1	
Target population: permanent residents of Lithuania aged 18-79 years.	
WAVE 2	
Persons who took part at Wave 1 and agreed to be re-contacted for Wave 2 (5810 persons, i.e., 58% of the 10,036 persons interviewed at Wave 1).	
- SAMPLE REFRESHMENT: In addition to these persons, 12882 individuals were also contacted before Wave 2. These persons were NOT interviewed at Wave 1 and are NOT included in the harmonised Wave 2 file.

Sampling

Sampling Procedure

WAVE 1 SAMPLING PROCEDURE

1. Sampling frame

- 1.1 Type of frame: List of geographic units and population as of 1 January 2006, Statistics Lithuania.
- 1.2 Frame coverage: Individuals residing in Lithuania aged 18-79 years, excluding institutionalised persons (prisons, army, hospitals, etc.).
- 1.3 Frame size: 2,557,085 individuals
- 1.4 Level of units available: Settlements and districts within urban areas.

2. Sampling method

- 2.1 Sampling method type: Multistage random sample design had been used for the study. The first stage of the sampling procedure consists in defining administrative regions of Lithuania: 10 such regions are defined. In order to identify cluster of sampling, sampling points are selected according to the size of the settlements that are grouped into big, medium, small towns and villages. The number of the sampling points in each category depends on the percentage of population living in the settlements of this category.
- 2.2 Sampling stage definition
 - PSU: Administrative regions (counties).
 - SSU: Settlements.
 - TSU: Individuals aged 18-79.
- 2.3 Sampling stage size
 - PSU: 10.
 - SSU: 318.
 - TSU: 10,036.
- 2.4 Unit selection: Systematic random.
- 2.5 Final stage unit selection: SRS (Simple Random Sampling).
- 2.6 Within Household unit selection: Last birthday method.
- 2.7 Stratification: Implicit.
- 2.8 Sample size
 - Starting size sample: 912 PSU's (912 x 11 = 10,032)
 - Aimed total size at Wave 1: 10,036.
 - Aimed total size at Wave 3: None.
- 2.9 Estimated Non-response
 - Initial non-response: Not estimated.
 - Yearly attrition: Not estimated.
 - Non response measures: Not applicable for random route methodology.
 - Within household non-responses measures: Three call-backs were used in order to contact the household or eligible respondent. If after three call-backs there was no contact, no other measures were used and hence, the household was marked as non-response.

WAVE 2 SAMPLING PROCEDURE

Sampling: panel (wave 1 database of addresses). All the Wave 1 persons who had agreed to be recontacted for a second interview (i.e., 5810 respondents which is equal to 58 of Wave 1 respondents).

SAMPLE REFRESHMENT: In addition to these persons, 12882 individuals were also contacted before Wave 2. These persons were NOT interviewed at Wave 1 and they represent a new sample. This allowed to carry out 5748 additional completed interviews. These interviews are NOT included in the released harmonised Wave 2 file.

ESTIMATED NON-RESPONSE

- Initial non-response: 5810 respondents of the 1st wave agreed to be interviewed during the 2nd wave of GGS in 2009. After the 1st wave while collecting updated contact information about respondents we received following information:

272 respondents died/ were ill / not able to communicate;

449 respondents moved to other country;

691 respondents moved to other location, contact information not available;

443 respondents - no contact with them, no information about them available.

- Yearly attrition: None, the yearly attrition was not estimated

- Non response measures: Sending post cards after the fieldwork, Sending letters and address cards for checking the contact information in 2007 and 2008.

If no response received via ordinary mail, respondents were contacted via phone from address' data base. If telephone number was not available, interviewers visited addresses from data base and collected updated information. Respondents having e-mail addresses were sent e-mail letters with request for updated contact information.

- Within household non-responses measures: In wave 2, no specified number of visits in order to contact necessary person and conduct the interview. In ad hoc survey - three call-backs were used in order to contact the household or eligible respondent. If, after three call-backs there was no contact, no other measures were used - the household was marked as non-response

Response Rate

WAVE 1

Response rate - Final disposition codes:

I = complete interview: I = 10,036

P = partial interview: P = 0

NE = non-eligible : NE = 1,687

NC = non-contact : NC = 7,634

R = refusal: R = 7,685

O = other non-response: O = 2,842

UC = unknown eligibility, contacted: UC = DK

UC = unknown eligibility, non-contact: UC = DK

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: eC = DK

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: eN = DK

WAVE 2

Response rate - Final disposition codes:

I = Complete interview: I= Wave 2 - 2294 (total number of addresses used - 3176); In ad-hoc survey - 5748

P = Partial interview: P=0

NE = non-eligible: NE= Wave 2 - 0; In ad-hoc survey - 539"

NC = non-contact: NC= Wave 2 - 293 (total number of addresses used - 3176); In ad-hoc survey - 2427

R = refusal: R= Wave 2 - 376 (total number of addresses used - 3176); In ad-hoc survey - 2695

O = Other non-response: O= Wave 2 - 213 (total number of addresses used - 3176); In ad-hoc survey - 1147

UC = unknown eligibility, contacted: UC= dk

UC = unknown eligibility, non-contact: UC= dk

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: eC= dk

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: eN= dk

Weighting

WAVE 1

A weighting procedure was used in order to adjust the sample. Weight coefficient composes information about sex, age and type of settlement (rural-urban).

WAVE 2

Wave 2 - no.

Ad hoc survey - yes. A weighting procedure was used in order to adjust the sample. Weight coefficient composes information about sex, age and type of settlement (rural-urban).

Data Collection

Data Collection Dates	Wave 1: start 2006-04-01 Wave 1: end 2006-12-30 Wave 2: start 2009-06 Wave 2: end 2009-12
Data Collection Mode	Method: Face-to-Face (personal interview). Technique: Paper and Pencil.

Data Collection Notes

WAVE 1 DATA COLLECTION

1. Interviewers

1.1 Total number of interviewers: 191.

1.2 Number of interviewers in the field: Each interviewer had to conduct particular number of interviews during specific period. Some of them could finish the work earlier than others.

1.3 Network organization: Field coordinators: field manager in central office; three regional supervisors in central office; four regional supervisors in regions.

1.4 Working arrangement of interviewers: Contracted - other.

1.5 Payment of interviewers: Per interview.

2. Interviewer training

2.1 General interviewing: Interviewers are trained before each survey. They always are instructed on general interviewing techniques. Gallup has developed interviewers' manual including instructions how to behave in possible complicated situations, how to speak with potential respondent, how to persuade him/her to take part in the survey, how to ask questions, etc.

2.2 Survey specific: All interviewers were instructed before GGS survey. First step of training was performed with regional supervisors. They were informed about the purpose of the survey and about the necessity strictly to follow requirements. Regional supervisors were asked to read through whole questionnaire, noticing and commenting all the difficulties, and to ask questions if there were any unclear things. Regional supervisors were given prepared instruction for interviewers and they used it while reading the questionnaire. After that they had to make one interview each themselves and commented difficulties experienced. All their comments and difficult situations were discussed with project manager and field supervisor. Second step of training was performed by regional supervisors with interviewers in separate regions. The procedure was the same - they were informed about the purpose of the survey and about the necessity strictly to follow the requirements. Interviewers were asked to read through whole questionnaire, noticing and commenting all the difficulties, and to ask questions if there were any unclear things. Interviewers were given prepared instruction for interviewers and they used it while reading the questionnaire. After that they had to make interview themselves and to comment difficulties experienced. All their comments and difficult situations were discussed with regional supervisor. Interviewers were trained in persuading the respondents to participate in next wave of the survey also. After training each interviewer was given one questionnaire and was asked to interview one person. These questionnaires were brought to regional supervisors and checked. If everything was done well, questionnaires were filled correctly, interviewers were allowed to conduct GGS survey interviews. If questionnaires were filled not correctly, interviewer either had to repeat training course, or he/she was not allowed to do interviews in this survey.

2.3 Length: Trainings - 8 full working days. Training contained both general interviewing questions and survey specific issues. Approximately one third of time was devoted to general interviewing and two thirds of time to survey specific issues.

2.4 Control of performance: After the completed questionnaires were brought to the supervisor they are ranged according to number of interview on random route administration sheet. Demographic characteristics of the respondent in the questionnaire were compared with demographic characteristics in random route administration sheet.

Next step - to check if interviewers chose necessary person for interview according to the birthday rule.

On the third step of quality control - all questionnaires were checked by supervisors: accuracy of data recording and following skip rules was checked. If there were some inaccurate or not clear parts, interviewers had to re-contact respondent and clarify obscurities.

Randomly selected 10% of respondents of each interviewer were re-contacted in order to check if interview was really conducted and if interviewer presented respondent correct information about the survey. Respondents most often were re-contacted by phone. Regional supervisors followed description of random route by randomly selected interviewers and visited respondents at their home for interviewers work control. All respondents were asked about the willingness to take part in the next waves of GGS and if agreed, their names and addresses were recorded. After the fieldwork finished, they were re-contacted by mail, phone or in-person and their data checked on a regular base.

2.5 Interviewer survey: No.

3. Contact protocols

3.1 Advance letter: No.

3.2 Cold contacts: Face-to-face.

3.3 Scheduling / scattering: Yes. Contact attempts were scattered over different days of the week (week-days and week-ends) and different time of the day.

3.4 Contact history: Yes, in a regular contact sheet.

3.5 Min number of contacts: Number of interviews that should be conducted in PSU was prescribed (10-12 interviews per PSU, 3 call-backs per potential respondent).

2.6 Max number of contacts: Number of interviews that should be conducted in PSU was prescribed, not number of contacts.

4. Questionnaire localization

4.1 Validation: Yes, back-translation.

4.2 Pre-test: A pilot was carried out in March 2006 (150 respondents; 75 men + 75 women; 95 aged 18-49 + 55 aged 50-79; number of interviewers : 104; number of settlements: 67 ; mean length of the interview: 139 minutes, min 54 minutes, max 280 minutes, mode - 95 minutes, 25th percentile 105 minutes, median 130 minutes, 75th percentile 172 minutes). Major findings of the pilot: questionnaire is too long and too complicated. Two unacceptable themes: (1) possessions in household and inheritance, (2) partners and fertility (for older people). The majority of questionnaire adaptation was done in the Section 10 of the GGS Wave 1 Core questionnaire, namely some more general questions on the eagerness of respondent to answer the questions on possessions were added, while some questions were dropped (i.e. 1010-1018).

4.3 Length of interview: In the majority of cases respondents were co-operative. The average duration of interview was about 80 minutes depending on person interviewed - young or old, single or living with family, having several children or none, etc. In approximately one fifth of interviews other persons participated - children (most often small), parents or partner.

WAVE 2 DATA COLLECTION

1. Interviewers

1.1 Total number of interviewers: 179

1.2 Number of interviewers in the field: 118 for wave 2 and 151 in ad-hoc of new respondents.

1.3 Network organization: Field coordinators: field manager in central office, three regional supervisors in central office, four regional supervisors in regions.

1.4 Working arrangement of interviewers: Contracted - other

1.5 Payment of interviewers: Per interview

2. Interviewer training

2.1 General interviewing: Interviewers are trained before each survey. They always are instructed on general interviewing techniques. Gallup has developed interviewers' manual including instructions how behave in possible complicated situations, how to speak with potential respondent, how to persuade him to take part in the survey, how to ask questions, etc. Before the 2nd wave interviewers were instructed how to behave in situation if the person who agreed to participate in longitude refuses in the last moment.

2.2 Survey specific: same as for Wave 1

2.3 Length: same as for Wave 1

2.4 Control of performance: In wave 2, demographics of each completed interview was checked with demographics from personal card of the participant of the 1st wave.

Ad-hoc survey of new respondents : After the completed questionnaires were brought to the supervisor they are ranged according to number of interview on random route administration sheet. Demographic characteristics of the respondent in the questionnaire were compared with demographic characteristics in random route administration sheet. Next step – to check if interviewers chose necessary person for interview according to the birthday rule.

In wave 2 and in ad hoc survey all questionnaires were checked by supervisors - accuracy of data recording and following skip rules was checked. If there were some inaccurate or not clear parts, interviewers had to re-contact the respondent and clarify obscurities.

Randomly selected 10% of respondents of each interviewer were re-contacted in order to check if interview was really conducted and if interviewer presented respondent correct information about the survey. Respondents most often were re-contacted by phone. Regional supervisors followed description of random route by randomly selected interviewers and visited respondents at their home for interviewers work control. All respondents were asked about the willingness to take part in the next waves of GGS and if agreed, their names and addresses were recorded.

2.5 Interviewer survey: None

3. Contact protocols

3.1 Advance letter: Respondents who agreed to participate in wave 2 were contacted several times during the period between 1st and 2nd waves - after first wave post card was sent with thank for participation. After that - 2 letters reminding about the second wave and with request to update contact information via ordinary mail. If no response received via ordinary mail respondents were contacted via phone or via e-mail or face-to-face.

In af hoc survey of new respondents - letter informing introducing GGS survey, the subject and the aim of the survey, the agency conducting interviews in Lithuania, the use of data in the future, etc. and asking potential respondents to take part in it.

3.2 Cold contacts: Face-to-face

3.3 Scheduling / scattering: Yes. Contact attempts were scattered over different days of the week (week-days and week-ends) and different time of the day.

3.4 Contact history: In ad hoc survey - in a regular contact sheet

3.5 Min number of contacts: In wave 2 - no minimum number of contacts.

In ad hoc survey - number of nterviews that should be conducted in PSU was prescribed (10-12 interviews per PSU, 3 call-backs per potential respondent)

2.6 Max number of contacts: In wave 2 - no maximum number of contacts.

In ad hoc survey - number of interviews that should be conducted in PSU was prescribed, not number of contacts

4. Questionnaire localization

4.1 Validation: back-translation

4.2 Pre-test: DK

4.3 Length of interview: DK

Questionnaires

Structured questionnaire in Lithuanian and in Russian.

Data Collector(s)

Institute for Demographic Research, Lithuanian Social Research Centre (IDR LSRC)
Baltic Surveys Ltd. (Gullop)

Supervision

WAVE 1 & WAVE 2 ACTIONS

1. Dealing with nonresponse:

1.1 Screening: No.

1.2 Refusal conversion: Gallup (Baltic Surveys Ltd. is member of Gallup Inc.) has developed an Interviewers' Manual where possible complicated situations are described, most often asked questions by respondents and possible answers to them are listed. During interviewers' training this issue is usually widely discussed.

1.3 Incentives: No.

2. Tracking of sampled units

2.1 Respondent contact information: Yes, contact details of the respondent were collected.

2.2 Other contact information: Yes, contact details of a proxy (such as parents, friend) were collected.

2.3 Cards: A "thank-you-letter" and a "change-of-address-notification" card (with paid postage fee, included in all the mailings as a standard part of the letter) were sent to all the respondents in 2007 and in 2008. If there were e-mail addresses given, "change-of-address-notification" messages were sent to these addresses also. If there was no postal information, respondents were called by phone or visited.

2.4 Additional surveys: No.

2.5 Administrative records: No.

Data Processing & Appraisal

Data Editing

WAVE 1 & WAVE 2 OPERATIONS

Consistency of all questionnaires was checked by supervisors first. In data entry process skip rules were used in order to avoid mistakes. When data was entered, data file was cleaned by detecting errors and correcting them.

Disclaimer

The authors and producers bear no responsibility for the uses of the GGS data, or for interpretations or inferences based on these uses. The producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

Files Description

Dataset contains 2 file(s)

GGG_Wave1_Lithuania_V.4.2.	
# Cases	10036
# Variable(s)	1414
File Structure	Type: relational Key(s): arid (R identification number)
<p><u>File Content</u> GGG Wave 1</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><u>Version</u> Harmonized dataset, GGS Wave1, version 4.2.</p>	
<p><u>Processing Checks</u> DATA HARMONISATION</p> <p>The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:</p> <ol style="list-style-type: none"> 1. Label checks This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets. 2. Dealing with grids The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest). 	

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

IMPROVEMENTS INTRODUCED WITH V.4.2. (February 2014):

The update from v4.1 to v4.2 does not include corrections of existing variables.

The update only includes additional variables which are derived from the pre-existing datasets

- Variables derived from grid variables and variables which concern the respondents and his/her partner: numdissol numdivorce nummarriage numpartners livingwithpartner childprevp femage maleage femeduc maleeduc fertintent numbiol numres numnonres numstep numallchild ageyoungest ageoldest numrespleave numotherparentleave coreschild coresparen coresgrandp coressibl.

- Variables derived from month and year variable:

a808Dur a822Dur a907Dur a911Dur a914Dur; a303cAgeP a315AgeP a316cAgeP a374cAgeP a608AgeP a610AgeP a617bAgeP a621AgeP a914AgeP a941AgeP; a107AgeR a121AgeR a150AgeR a239aAgeR a239bAgeR a240AgeR a301AgeR a302bAgeR; a311AgeR a314bAgeR a314dAgeR a371AgeR a372bAgeR a603AgeR a608AgeR a610AgeR a613AgeR a614AgeR a619AgeR a621AgeR a816AgeR a822AgeR a871AgeR a5116AgeR a5117bAgeR; a302bTdiff a314bTdiff a314dTdiff a372bTdiff.

- Variables derived from hours and minutes variables: a324_hour a520_hour a540_hour.

- Variables derived from frequency and unit variables:

a205mnth,a241mnth,a325mnth,a355mnth,a359mnth,a363mnth,a367mnth,a521mnth,a541mnth,a1008mnth,a1102mnth; a203c_?w a204c_?w.

- Occupation variables recoded into ISCO-88 1 digit: a828_1dig a832_1dig a861_1dig a917_1dig a921_1dig a933_1dig a5112_1dig a5114_1dig.

FIRST DATASET RELEASED: V. 4.1 (April 2012).

File Structure	Type: relational Key(s): arid (R identification number)
<p><u>File Content</u> GGG Wave 2</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a19_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p> <p><u>Version</u> Harmonized dataset, GGS Wave2, version 1.2.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.2 (April 2015)</p> <p>The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.</p> <ul style="list-style-type: none"> - Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrespartafterw1, blivingwithpartner, bchildprevp, bnchildprevp, bfemage, bmaleage, bfemeduc , , bmaleeduc, bfertintent, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl , bhhtype. - Variables derived from month and year variable: b121AgeR, b150AgeR , bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Agb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP, b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP. - Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour_x. - Variables derived from frequency and unit variables: b203c_xw, b204c_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth. - Occupation variables recoded into ISCO-88 1 digit: b828_1dig, b832_1dig, b861_1dig, b917_1dig, b921_1dig, b933_1dig. - Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, 	

bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime_1801, bnumparttime_1802, bnumpartfulltime_1803, bnumfulltime_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurrunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876_xAgeR, bn877_xAgeR, bn878xAgeR, bn879_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

FIRST DATASET RELEASED: V.1.1. (April 2014).

Processing Checks

DATA HARMONISATION

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

Variables List

Dataset contains 2601 variable(s)

Definition Q 001

Pre-question Interviewer Instruction: Write in the time and date when the interview starts.

Literal question Interview started at...on...

Interviewer's instructions Interviewer Instruction: Read the following text.
 This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

ayear: Yr of interview

Information	[Type= discrete] [Format=numeric] [Range= 997-2147483624] [Missing=*/9997/9998/9999]
Statistics [NW/ W]	[Valid=10036 /-] [Invalid=0 /-]
Definition	Q 001
Pre-question	Interviewer Instruction: Write in the time and date when the interview starts.
Literal question	Interview started at...on...
Interviewer's instructions	Interviewer Instruction: Read the following text. This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

Value	Label	Cases	Percentage
2006		10036	100.0%
9997	does not know	0	
9998	refusal	0	
9999	not applicable/no response	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

aage: Age Respondent

Information	[Type= discrete] [Format=numeric] [Range= 18-2147483625] [Missing=*/996]
Statistics [NW/ W]	[Valid=10036 /-] [Invalid=0 /-] [Mean=46.897 /-] [StdDev=17.614 /-]
Definition	Consolidated variable.
Notes	Generated using household grid variables (ahg6m_1, ahg6y_1,ahg5_1) and amonth, ayear. If information on the month at birth / month of interview was missing, a 6 (june) was used in the calculation.

numdivorce: Total number of partnerships ending in divorce

Information	[Type= discrete] [Format=numeric] [Range= 0-3] [Missing=*]
Statistics [NW/ W]	[Valid=10036 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	The number of previous partners with whom Respondent was married AND broke up (code 1 on question 327 (a335a) and code 1 on question 330 (a343), "Partnership history" grid). Not available for Australia as partnership history grid differs in Australian survey

Value	Label	Cases	Percentage
0		8817	87.9%
1		1166	11.6%
2		50	0.5%
3		3	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

nummarriage: Total number of marriages

Information	[Type= discrete] [Format=numeric] [Range= 0-3] [Missing=*]
Statistics [NW/ W]	[Valid=10036 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	The number of previous partners with whom Respondent was married (code 1 on question 327 "Partnership history" grid) PLUS the current marriage if one exists (code 1 on question 302 / variable a302a OR code 1 on question 310 / variable a314a).

Value	Label	Cases	Percentage
0		2799	27.9%
1		6865	68.4%
2		360	3.6%
3		12	0.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

numpartnerships: Total number of partnerships

Information	[Type= discrete] [Format=numeric] [Range= 0-4] [Missing=*]
Statistics [NW/ W]	[Valid=10036 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	The total number of partnership dissolutions (see variable numdissol) PLUS the current partnership if one exists (partner is present in the Household grid). Note that this variable only refers to resident partners, past and present.

File : GGS_Wave1_Lithuania_V.4.2.

numpartnerships: Total number of partnerships

Not available for Australia as partnership history grid differs in Australian survey

Value	Label	Cases	Percentage
0		2102	20.9%
1		7205	71.8%
2		677	6.7%
3		40	0.4%

childprevp: any children from previous partnership

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=10036 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent had children with any previous partner (question 332 (a345), "Partnership history" grid); "No" otherwise. Data not available for Australia, Hungary, Estonia or Italy.

Value	Label	Cases	Percentage
1	Yes	1164	11.6%
2	No	8872	88.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

femage: If partnered: age of female

Information	[Type= discrete] [Format=numeric] [Range= 14-85] [Missing=*]
Statistics [NW/ W]	[Valid=2640 /-] [Invalid=7396 /-]
Definition	Derived variable
Universe	If R has a partner
Notes	This variable indicates the age of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents age is used (aage.) If the respondent is male and in a relationship with a female then their age is derived depending on the nature of the relationship. For a resident partner the age was copied from the Household grid (ahg5_); for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y). Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset. Note that this variable does not have a value for same-sex partnerships.

a107AgeR: R's age of starting to live in country of interview

Information	[Type= discrete] [Format=numeric] [Range= 0-63] [Missing=*997/998/999]
Statistics [NW/ W]	[Valid=435 /-] [Invalid=9601 /-] [Mean=17.34 /-] [StdDev=12.315 /-]
Definition	Derived variable from Q 107 core questionnaire
Universe	If code 2 on Q 105
Literal question	In what month and year did you first start living permanently in [country]?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the country of interview was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December" Data is not available for Estonia.

# a121AgeR: R's age of starting to live in current dwelling			
Information	[Type= discrete] [Format=numeric] [Range= 0-78] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=9126 /-] [Invalid=910 /-] [Mean=29.075 /-] [StdDev=15.079 /-]		
Definition	Derived variable from Q 115 core questionnaire		
Literal question	In what month and year did you start living in this [type of accommodation]?		

a121AgeR: R's age of starting to live in current dwelling

Notes

R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the current dwelling was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Data is not available for Estonia.

a150AgeR: R's age of achieving the current education level

Information	[Type= discrete] [Format=numeric] [Range= 0-69] [Missing=*997/998/999]
Statistics [NW/ W]	[Valid=5746 /-] [Invalid=4290 /-] [Mean=22.192 /-] [StdDev=4.826 /-]
Definition	Derived variable from Q 122 core questionnaire
Literal question	In what month and year did you reach that level?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". Data is not available for Norway.

a239aAgeR: R's age at birth of oldest grandchild

Information	[Type= discrete] [Format=numeric] [Range= 19-72] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=1958 /-] [Invalid=8078 /-] [Mean=48.25 /-] [StdDev=5.677 /-]
Definition	Derived variable from Q 239.a core questionnaire
Universe	If R has 2 or more grandchildren
Literal question	In what month and year was the oldest of your grandchildren born?

Notes
 R's time of birth was deducted from HH grid. If information on the month of birth / month at birth of oldest grandchild was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

# a301AgeR: R's age at start of living with current partner			
Information	[Type= discrete] [Format=numeric] [Range= 1-74] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=5663 /-] [Invalid=4373 /-] [Mean=24.905 /-] [StdDev=6.607 /-]		
Definition	Derived variable from Q 301 core questionnaire		
Universe	If R lives together with a partner		
Literal question	In what month and year did you and he/she first start living together?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when started living with current partner was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a303cAgeP: Partner's age of obtaining permanent residence

Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*997/998/999]
Statistics [NW/ W]	[Valid=232 /-] [Invalid=9804 /-] [Mean=18.853 /-] [StdDev=11.569 /-]
Definition	Derived variable from Q 303.c core questionnaire
Universe	If code 2 on Q 303.a
Literal question	In what month and year did he/she first start living permanently in [country]?
Notes	Partner's time of birth was either deduced from HH grid. If information on partner's month of birth / month when partner started living permanently in country was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a310: Have relationship to somebody without cohabitation

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]
Statistics [NW/ W]	[Valid=4305 /-] [Invalid=5731 /-]
Definition	Q 306 core questionnaire
Universe	If R does NOT have a co-resident partner
Literal question	Are you currently having an intimate (couple) relationship with someone you're not living with? This may also be your spouse if he/she does not live together with you. Our survey does not only cover heterosexual relationships, but also same-sex relationships. If you have a partner of the same sex, please answer the following questions as well.

Value	Label	Cases	Percentage
1	yes	472	11.0%
2	no	3833	89.0%
7	does not know	0	
8	refusal	0	
9	no response/not applicable	0	
Sysmiss		5731	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

a311AgeR: R's age at start of current relationship

Information	[Type= discrete] [Format=numeric] [Range= 10-72] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=460 /-] [Invalid=9576 /-] [Mean=27.004 /-] [StdDev=10.911 /-]
Definition	Derived variable from Q 307 core questionnaire
Universe	If R has a non-resident partner (code 1 on Q 306)
Literal question	In what month and year did this relationship start?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when started current relationship was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a374cAgeP: Partner's age of obtaining permanent residence

Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*997/998/999]
Statistics [NW/ W]	[Valid=242 /-] [Invalid=9794 /-] [Mean=18.736 /-] [StdDev=11.551 /-]
Definition	Consolidated variable from variables a303AgeP and a316cAgeP (derived variables from Q 304.c and Q 312.c core questionnaire).
Universe	If R's partner not born in [country]
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?
Notes	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"
